Installation Tips:

1. Assembly of your playsystem will take 4 hours depending on your level of experience. Assembly will require an adult helper.
2. Empty each box and organize the boards alphabetically. When you are finished organizing the boards complete an inventory to be certain that you have received all of the parts.
3. Sort all of the hardware in a large box or container. This will reduce the chance of losing small parts.
4. Pay close attention to the length and diameter of bolts and screws. There are different sizes in the same bag that look alike. To correctly identify hardware, match it up to the "actual size" drawings located in the hardware identification section
5. Gather all of the tools listed in the "tool list" section before you start
6. Read all of the instructions thoroughly. This enclosure cannot be installed using only the illustrations.
7. Complete each step before moving on to the next. Jumping ahead in the instruction manual can be unsafe and create extra work.
8. Retain this manual for future reference. Keep it in a safe place where you can refer to it as needed.
