Meditech Anavar, also known as oxandrolone, Oxandrin, Glonavar, Anvar-10, or Oxanabol, is an oral anabolic steroid, which is comparable to male hormones.. The main attractions to Anavar were increased muscle strength, lean muscle gains with minimal water retention, and low toxicity.. This medication, which comes in injectable, tablet, and powder form, helps people to regain weight after a ... oxidation), or when you break down muscle when you exercise. BTW when you exercise you don't only use proteins, carbs and fats for energy, you also use vitamins and minerals along with it. The loss of the nutrients is also catabolic process.

Anavar would definitely fall under the 'safe' category for anabolic steroids, due to its minimal side effects. It is important to note though that you cannot expect a lot of weight gain or muscle growth. This product is ideal for men and women to use in your diet to get in shape, get stronger and conserve muscle mass.

Anavar by Meditech (Oxandrolone) is an anabolic steroid which resembles closely the male hormone Testosterone. The steroid is a derivative of DHT (Dihydrotestosterone) made by substituting the second carbon atom of the molecular formulae with an oxygen atom and thus resulting in a molecular formula represented as.. Anavar comes in the form of a capsule and is consumed orally.

→ □ Une source d'acide gras SATURÉ (AGS) NATURELLE et de QUALITÉ, non ce n'est pas une blague et un cliché de plus qui saute, le gras saturé n'est pas à bannir, il augmenterait par exemple le bon cholestérol ou encore réduirait les risque d'AVC... plusieurs études non financées par les industriels le démontrent. Ces AGS seraient même bénéfique pour une perte de poids (pour être simpliste) du fait qu'ils mettent plus de temps à être digérés et donc améliorant la sensation de satiété. Attention à ne pas en abuser non plus, comme disait Paracelse "c'est la dose qui fait le poison". La glace VANILLE Haagen-Dazs popularisée par Claudia en est le parfait exemple avec une composition minimaliste et simpliste ((ingrédients : crème fraîche (39 %), lait écrémé concentré, sucre, jaune d' œuf, extrait de vanille, et hop terminé bonsoir □)) qui permettent aussi de savourer son pré-dodo. Le fromage, le lait entier, l'huile de coco sont aussi des sources d'AGS intéressantes.
