APP User login

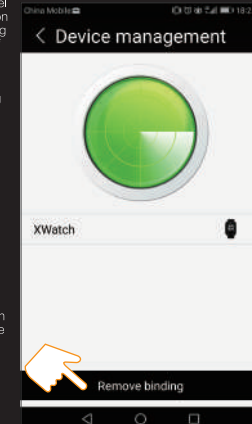

Binding watch and phone

Unbinding watch and phone

Cancel reminder function
If you just want to temporarily cancel the reminder etc component function from the watch, you or need to turn off the BT on the watch (press & hold S3 button for 3 seconds) to turn off BT. Watch and mobile phone will connect automatically when turning on BT again, and all relevant functions can be resumed immediately, if binding is removed, then next time you need to do binding again before using).

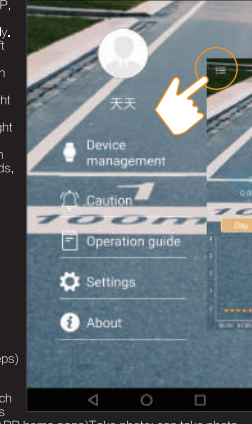

Remove bounding
1, Click icon on the upper left corner of the APP main interface (to enter the menu bar),
2, Click "Equipment management" on the menu bar to "Remove the current binding",
3, Note: Unbinding watch and Phone will require one more step: To cancel the BT connection between watch and Phone, take Phone for example, find the XWatch in the device list of "Setting-BT" and click "ignore the device".

APP operation

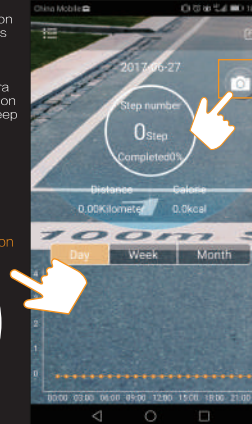

Basic instructions
1, After initial installation of the APP, system will introduce the basic operation of the APP immediately.
2, Click icon on the upper left corner of the APP main interface to enter the APP menu bar, click on the icon again to return to the main interface (Note: see the right picture).
3, Click icon on the upper right corner of APP main interface to share the message information to you friends (via WeChat, friends, WeChat Moments, Facebook, Twitter).

Menu description
1, Device management: mobile phone and watch binding or remove binding.
2, Reminder: Alarm clock and information reminder, users can choose to turn on or off the reminder of relevant information.
3, Operation manual: APP basic operation.
4, Target steps: The user sets the amount of movement per day (steps).
5, Other
Circle of friends: User could add other user of the system (the watch is sports friend, also could access "Friends Sports Ranking" (on APP home page)) Take photo: can take photo directly in the APP, also user can use the watch S3 button as the shutter button for taking photo remotely (on APP home page).

Remote camera

Operation steps
1, Make sure the BT connection between watch and phone is normal.
2, Click "take photo" from the menu bar of the APP.
3, Press the S3 button (camera shutter), then the icon on the bottom of the dial will keep flickering, which means the remote camera function is ready.

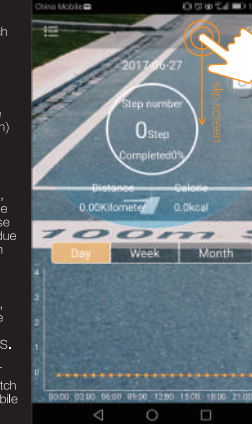

Data upload and refresh

Sport data upload
When the APP is normally connected to the watch, the watch sport data will be automatically uploaded to the cloud server.

Sport data refresh
On APP main interface: Swipe down from top of the screen (see right picture), you can get (refresh) the latest data of the watch, and upload it to the cloud server.

Attention:
Before using Pedometer function, please set sync the date and time on the watch accurately, otherwise the statistics may be inaccurate due to date & time mismatch between watch and cloud server.

Sport data of the watch is transferred to the phone via APP, which will then be uploaded to the cloud server via mobile phone network (G/G or W/FI) or GPRS. So to ensure data upload successfully, please make sure BT connection between phone & watch is normal, and make sure the mobile phone network is normal.

Connection instruction for some specific mobile phone

Due to default setting and permission reason, some Android phones may not support BT background data refresh and notification. Then the user may need to activate relevant permission manually. Take HUAWAI Honor X4 phone as an example:
1, In the phone Settings, enter the "Notification center", make sure QQ, WeChat, SportPlus etc APP status are all turned ON.
2, In the Settings, enter "Protected apps", make sure QQ, WeChat, SportPlus etc APP status are all turned ON.
3, In the Settings, enter "Permission manager", make sure "Trust this Application" option for QQ, WeChat, SportPlus etc APP are turned ON.
