Concentration	100%
Uses:	Raw material used in flavoring preparations and/or perfumery.
Respiratory prote	ction:
If the recommende	d technical measures are observed, no individual protection equipment is necessary.
Hand protection:	
PPE: Characteristics: CEN standards:	Protective gloves. «CE» marking, category II. EN 374-1, EN 374-2, EN 374-3, EN 420
Maintenance:	They should be kept in a dry place, away from possible sources of heat, and exposure to sunlight should be avoided as much as possible. Changes that could alter the gloves' resistance should not be made, nor should paints solvents or adhesives be applied.
Remarks:	They should be replaced whenever tears, cracks or deformations are found and when external dirt may reduce their resistance. The gloves should be of the correct size and fit the hand without being too loose or too tight. They must always be used with clean, dry hands.
	NITRILE: The list of chemical products against which the glove has been tested should be reviewed.
Eye protection:	
PPE: Characteristics:	Safety glasses. Category II CE marking. Eye protector against dust, fumes, mists, vapours and splashes.
CEN standards:	EN 166
Maintenance:	Visibility through the glasses must be optimal, so the lenses must be cleaned daily. The protectors must be disinfected periodically following the manufacturer's instructions. The smoothness of the moving parts should be checked.
Remarks:	Some signs of wear and tear include: yellow colouring of the lenses, superficial scratching of the lenses, scraping etc.
