Special Fire-Fighting Procedure: Avoid vapor inhalation. Keep away from sources of

ignition. Do not smoke. Wear positive pressure selfcontained breathing apparatus & protective clothing. Close containers may build up pressure when

Close containers may build up pressure when exposed to heat and should be cooled with water

spray.

Unusual Fire and Explosion Hazards: Vapor may travel to source of ignition and flash back.

Vapor may settle low or in confined spaces. May produce a floating fire hazard. Static ignition hazard can result from handling and use. Essential and vegetable oils have the potential to self-heat and contribute to spontaneous combustion when present on fabrics. Caution should be exercised in the storage

and launder of fabrics exposed to oils.

PPE and Precautions for Firefighters: Static charges generated by emptying package in or

near flammable vapor may cause flash fire. Use water

spray to cool unopened containers.
