# 14

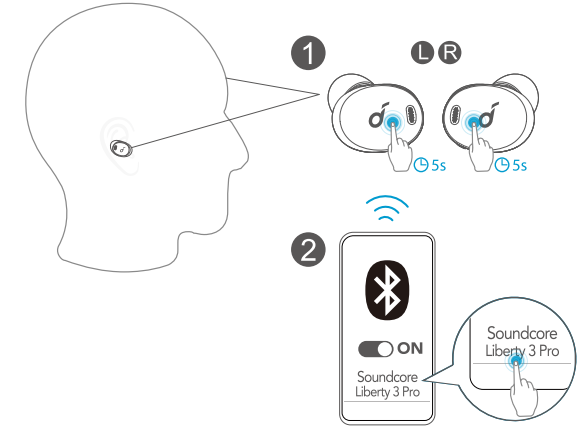

You can switch HearID ANC mode or transparency mode to normal mode in the Soundcore app.

- HearID ANC:** Take the ear canal test and tailor your noise cancellation experience.
- Transparency:** Stay aware of your surroundings while listening to music.

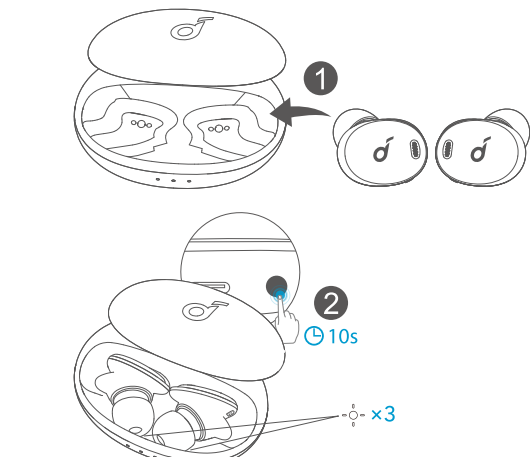

Use devices powered by Android 8.0 or later to experience LDAC quality sound. You can enable or disable LDAC using the Soundcore app.

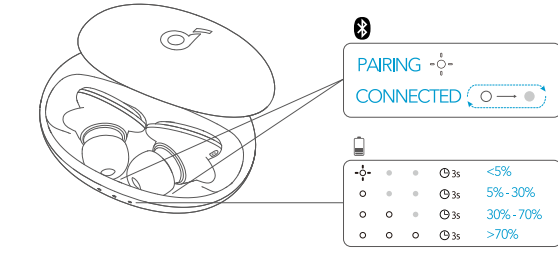

The playback will automatically pause when removing either earbud and will resume when wearing it again. Wear either earbud to automatically answer an incoming call.

The earbuds can connect with two Bluetooth devices at the same time. To pair with another device, wear the earbuds, then press and hold the touchpad on both earbuds for 5 seconds simultaneously.

Reset if the earbuds cannot properly pair with each other or with other devices. Delete the pairing history from your Bluetooth device first. Place the earbuds into the charging case and leave the case open. Press and hold the button on the case for 10 seconds until the LED indicators rapidly flash white 3 times.

- Steady white
- Flashing white
- Breathing white
- Light off
