(String... значения) - возврат Коллекции.unmodifiableList (Arrays.asList (значения)); - частный недействительный attachMoreExtras (Намерение намерения) - для (Запись На карте. Entry<String, Object> : moreExtras.entrySet() Значение объекта - entry.getValue(); Вид хаки, если (значение instance of Integer) - intent.putExtra (ключ, (Integer) значение); (Boolean) значение); - еще, если (значение instanceof Double) - intent.putExtra (ключ, (двойное) значение); - иначе, если (значение instanceof Float) - intent.putExtra (ключ, (Float) значение);</String, Object>> </String>> Step 9 - Complete the code in the Package IntentResult.java com.google.zxing.integration.android; IntentResult public final class - private final content of the line; StringName's private final format Private final byte-rawBytes; Integer's private final attitude; Private final error StringCorrectionLevel; IntentionResult (zero, zero, zero, zero, zero); IntentResult (String contents, String formatName, byte's rawBytes, Integer Orientation, ErrorCorrectionLevel) - this.contents - content; this.formatName - formatName; this.rawBytes - rawBytes; this.orientation - orientation; this.errorCorrectionLevel - errorCorrectionLevel; - getContents public line - return content - public line getFormatName - return formatMem; - Public byte-byte () getRawBytes () - return rawBytes; - Public integration of Integer getOrientation () @Override - return orientation;) - StringBuilder dialogText - new StringBuilder (100); dialogText.append (Format:). dialogText.append int rawBytesLength - raw bytes - zero? 0 : rawBytes.length; dialogText.append dialogText.append dialogText.append (EC level:).append (errorCorrectionLevel).append (); return dialogText.toString Step 10 - Export app from Android Studio. Start an exported app on your device instead of an emulator and feel free to scan any barcode. Watch the video tutorial to create the Barcode Reader app in Android Studio 1.4: Leave a message for further questions. Example: Scan this barcode You should see the text: found the book FORMAT: EAN_13 CONTENT: 9780123456786 Download app-release.apk from here and install it on the device for scanning barcodes. Page 2 Recognize from this tutorial how to play an mp4 movie using VideoView in the Android Studio 1.4 version. Create a new project called Play Video app; Minimum SDK - API 9; Android 2.3 (Pryanik). Create a new catalog in the raw-name res app. Copying the video you want to display in a new folder created. raw; I used a video with the name movie.mp4 in this example. You can download it here. In the activity_main.xml file, create VideoView to display the video. VideoView android:id=@id/videoView1 android:layout_width=wrap_content android:layout_height=wrap_content android:layout_centervertical=true android:layout_centerhorizontal=true'gt;'lt;'lt;'t:VideoView'gt; In the file activity_main.xml create a transparent button to play the video again by clicking the button. <Button android:id=@id/button1 android:layout_width=wrap_content android:layout_height=wrap_content android:layout_centervertical=true android:layout_centerhorizontal=true MainActivity.java (in onCreate). ButtonPlayVideo2 (Button)findViewById (R.id.button1); getWindow ().setFormat(PixelFormat.UNKNNOWN); Displays video file VideoView mVideoView2 (VideoView)findViewById (R.id.videoView1); UriPath2 - android.resource://com.example.toyo.playvideo/R.raw.movie; Uri uri2 - Uri.parse (uriPath2); mVideoView2.setVideoURI(uri2); mVideoView2.requestFocus(); buttonPlayVideo2.setOnClickListener (new button. OnClickListener () - @Override public void onClick (View v) - VideoView mVideoView2 (VideoView) findViewById (R.id.videoView1); VideoView mVideoView - new VideoView (it); String uriPath - android.resource and R.raw.movie; Uri uri2 - Uri.parse (uriPath); mVideoView2.setVideoURI(uri2); mVideoView2.requestFocus(); mVideoView2.start(); }); Start the app in the emulator. Enjoy the result! Warning: The app only works with mp4 video. If you have a .avi movie or other extension, re-image it to mp4 and add the video to the Android project. Watch the video tutorial to play the video in the Android Studio 1.4 version: Download the PlayVideo.apk app from here and install it on a video playback device. For further questions, leave a message. Message. android zxing generate barcode example
