Set up G-SYNC

NVIDIA® G-SYNC™ is an NVIDIA technology that empowers G-SYNC capable displays to show the best visuals with low latency and no tearing.

1. Apply following changes.

☑ **Enable G-SYNC, G-SYNC Compatible**

◉ Enable for full screen mode

◯ Enable for windowed and full screen mode

2. Select the display you would like to change.

XPN-GX27165QC

3. Display Specific settings.

☑ **Enable settings for the selected display model**

ⓘ Selected Display is not validated as G-SYNC Compatible.

To enable this monitor set it as primary display on <u>Set up multiple displays</u> Page

Description:

G-SYNC, G-SYNC Compatible allows your enabled monitor to stay in sync with your games render rate, increasing smoothness and reducing latency.

Typical usage scenarios:

Most useful for games that have variable render rates below the peak refresh rates of your monitor.
