components.

Please read before operating your new Titan Outdoor TV
Read Thoroughly Before Use.

Congratulations on your new Titan Outdoor TV. Each TV was custom handmade with extreme care in insuring you have the most reliable outdoor TV to handle the outdoor environments. To make sure of your safety and others please take the time to read this in full detail before installing or operating your outdoor TV.

Please keep this record along with your warranty in a safe place in case you need to refer back to this. Please read and follow.

WARNING:

Any unauthorized change or modifications to this equipment that is not approved by the manufacture could void the warranty. Since we modified this TV, we are now carrying the warranty. Please refer to our warranty to see what is covered and not covered.

WARNING:

The AC or power surge should not be plugged within ten **(10)** feet of any water source or operating within the same distance.

WARNING:

All TVs must be installed in a GFCI outlet for ground and must be rated for outdoor use or warranty is voided.

WARNING:

All TVs not only must be plugged into a GFCI rated for outdoors but also be plugged into a surge protector rated for your area and outdoors to protect from power surges. (Please note a power strip bar is not a surge protector.)

WARNING:

Do not have power cords laying on the ground or where water might have access to it. Please follow city guidelines on installing electricity outdoors.

WARNING:

Any Titan Outdoor TV is not under any circumstances able to be submerged in any liquid in any form of way.

WARNING:

Do not leave remote control outdoors, place indoors and away from water source and swimming pools.

WARNING:

Do not operate any Titan Outdoor TV during the following:
Rain, electrical storm, dust storm, hurricane. You should unplug the unit and bring inside if it is more than your typical storm during extreme conditions.

WARNING:

Ventilation is a must for the TV to breath from the back and bottom. First ventilation is located under the fabric on top and the other is underneath the bottom of the TV where the speakers are located.

WARNING:

Do not poke holes or have this unit rub against any edges that might cause the seal to break voiding your warranty. Should this happen unplug and contact us immediately to have the is unit save and repaired possibly at no cost in some cases minus the shipping.

Do not remove the metal studs that are mounted in the mounting holes. This is used to ensure that water will not enter the unit. Every mount comes with two sets of screws of each size. Use only the shorter set that will mount flush with the metal studs. All mounts are VESA approved mounting patterns.

CLEANING:

Clean with soft cloth using glass cleaner without ammonia ingredients or LED Screen cleaner.

TABLETOP SET UP:

Place unit on flat leveled surface and a place where wind or anything could cause the unit to tip over and fall.

INSTALLATION AND OPERATION FOR TITAN OUTDOOR TV

Mounting your unit on a wall mount:

Look for the smaller set of screws that comes with the bracket kit and mount the hanging bracket to the back of the TV using the small screws to have a flush look. Do not remove the metal studs or you will void your warranty.

Mount your unit possibly in a shaded area and out of way of impact. Since our TVs are custom made, our TVs are not designed to take high impact levels that might shatter the front panel.

Just like cars your TVs will last longer the more you protect it when not in use. We recommend that you get a cover from Amazon to insure lasting use of your outdoor TV.

Try not having the TV in direct sunlight since this will not have the same effect of a clean picture as if in a shaded area.

If needing to place the TV in an open no-shaded area, please face screen away from the sun's path to have the sun face the back of the TV.

Operating the TV unit:

Please refer to the original paperwork of the manufacture that is in the box.

Settings:

should your unit be reset, your unit will still have the brightness levels installed the TV and you should place your menu settings to the following.

1. Vivid or Dynamic
2. Brightness 50-75 percent
3. Contrast 80-100 percent
4. Color 75 percent
5. Temp. cool
