## Make your refurb stand out

The Aesys bus LED destination sign has an unparalleled visual impact. Through high definition characters, 120° horizontal visibility, and automatic brightness control, the electronic signs are easily visible day and night and in many weather conditions. They are built to be both lightweight and inexpensive to maintain due to the elimination of moving parts and the long life of LED.

Available in amber, white or full colour, the signs feature high performance surface mount technology (SMT). Destinations can be selected through the keypad and uploaded via USB stick.

PSV/08/023	Lamp Unit 12"

LED Replacement for traditional fluorescent tube fittings, saving both energy and running costs.

Dual polarity meaning the tube can be installed in any orientation.

Specifically designed with Buses in mind. The fitting meets strict Selv (Supply Extra-Low Voltage) requirements, meaning that it can be situated in Zone 1 areas and operates under 50V, rather than the usual 230V mains supply.

Other Colours also available on request

For added surge protection from vehicle current spikes fit part number PSV/08/136 in line to each tube.

Recommended for added protection but not essential.
