

Spectrum Adhesives

Manual And Metered Glue Applicators

Spectrum is an industrial adhesive company dedicated to the needs of the Wood Products Industry. In addition to the proper adhesive, our promise of better gluing often requires the proper process. There is a wide gap between fully automatic equipment and the use of hand held squeeze bottles. In an effort to fix this, Spectrum Adhesives offers highly functional, affordable and scalable application equipment.

Handheld Spreaders

Handheld spreaders offer a simple, yet dramatic, upgrade from paint rollers. The handheld hopper spreaders, offer faster, more consistent, adhesive spread for lay-up work with water based adhesives.

Manual & Metered Systems

The portable pressure tank systems offer a modular design that improves adhesive application through ease-of-use and consistency. The manual systems, combined with the appropriate nozzle(s) offer increased efficiency and productivity for veneering, edge, and face gluing. The metering systems offer increased consistency for certain assembly applications (e.g. doweling).

Spectrum Adhesives

Guided Semi-Automatic Systems

The semi-automatic systems add consistency and productivity to the metered tank systems. Choose Guided Semi-Automatic Systems where moving the work piece to the glue rather than the glue to the work piece is desired.

Typical Applications Include

- Stile and rail profiles
- Dovetail drawers
- Doweling
- Finger Joints

Key Benefits

- Easily adjustable guides quickly assist in proper placement of work piece
- Custom glue nozzle assures glue is applied to the work piece where you want it
- Work piece-triggered metering dispenses the correct amount of adhesive every time
- Space saving table top design fits easily into existing work space
- Easy clean up (nozzle fits on water tap)
