5 Solutions of common problems

The following table contains frequently asked questions and solutions. Please read it carefully.

Problem	Solution
Low voice or voiceless	1. Detection of Bluetooth device volume, adjust the volume to the appropriate location.; 2. Select the correct audio input channel; make sure all cables are properly connected;
Loudspeaker noise	1. Cables are properly connected; 2. Replace the other audio cables; 3. External output of the audio cable should free of noise.
No power or no charge	1. The adapter is properly connected to the host; 2. Check that the voltage and current of the power adapter meet the requirements.
Bluetooth connection matching failed	1. Check the sound is in the searching state (the Bluetooth pairing button flashes quickly). 2. Or reboot ,press the Bluetooth pairing button to switch;
Audio input mode silent	check that the audio cable is properly connected.
Music play Intermittent	1. Whether effective connection distance beyond the sound, or speaker and a Bluetooth device with obstacles. 2. Try to replace another Bluetooth device for playback.

4

Bluetooth speaker TWS function instruction

A Speaker

B Speaker

1. Simultaneously short press the button ① on the Speaker "A" and "B"; then, a sound "ding dong" will be heard and enter into the TWS pairing mode.
2. Open the "Bluetooth device" on the mobile phone and search for matching DF-520VS

Note: if you can't sure whether the bluetooth speaker is connected to other devices, you can disconnect all the bluetooth connection related to the speaker by long pressing the button ③. That will prevent the bluetooth speaker from being unable to use the TWS function when it is already connected to other devices.
