With the top of the saddlebag open, position the lid cover over one end of the top and then stretch to secure the cover over the other end.

Note: this is a tight fit but the material will stretch to allow the cover to pass over the housing and ensure a snug, contoured fit.

Step 2 (Cont...)

(Fig. 2.1)

Step 3 (Fig. 3)

Arrange the material by adjusting as necessary to position the cover smoothly over the housing.

Note: the hinge side of the lid cover may be positioned by working the material slightly “back & forth” to tuck underneath the hinge. As well, the cover can be installed over the latch handle without interfering with its operation.
