# beaducation. con Ring Sizing Chart 

To properly size a ring, you need to know the thickness of your material and the desired ring size. From there you can use this chart to intersect the two (from the columns and rows) to determine how long you need to cut your metal (in mm).

For example, if you want a size 6 ring and you are using 18 gauge material, you need to cut your material to 54.7 mm .

## MATERIAL THICKNESS

| US Ring Size | 10 gauge <br> (2.6mm) | 12 gauge $(2.1 \mathrm{~mm})$ | 14 gauge <br> (1.6mm) | 16 gauge <br> (1.3mm) | 18 gauge <br> (1.0mm) | 20 gauge (.8mm) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 4 | 54.7 | 53.1 | 51.5 | 50.6 | 49.6 | 49.0 |
| 4.5 | 55.9 | 54.3 | 52.8 | 51.8 | 50.9 | 50.3 |
| 5 | 57.2 | 55.6 | 54.0 | 53.1 | 52.2 | 51.5 |
| 5.5 | 58.4 | 56.9 | 55.3 | 54.3 | 53.4 | 52.8 |
| 6 | 59.7 | 58.1 | 56.5 | 55.6 | 54.7 | 54.0 |
| 6.5 | 60.9 | 59.4 | 57.8 | 56.9 | 55.9 | 55.3 |
| 7 | 62.2 | 60.6 | 59.1 | 58.1 | 57.2 | 56.5 |
| 7.5 | 63.5 | 61.9 | 60.3 | 59.4 | 58.4 | 57.8 |
| 8 | 64.7 | 63.1 | 61.6 | 60.6 | 59.7 | 59.1 |
| 8.5 | 66.0 | 64.4 | 62.8 | 61.9 | 60.9 | 60.3 |
| 9 | 67.2 | 65.7 | 64.1 | 63.1 | 62.2 | 61.6 |
| 9.5 | 68.5 | 66.9 | 65.3 | 64.4 | 63.5 | 62.8 |
| 10 | 69.7 | 68.2 | 66.6 | 65.7 | 64.7 | 64.1 |
| 10.5 | 71.0 | 69.4 | 67.9 | 66.9 | 66.0 | 65.3 |
| 11 | 72.3 | 70.7 | 69.1 | 68.2 | 67.2 | 66.6 |
| 11.5 | 73.5 | 71.9 | 70.4 | 69.4 | 68.5 | 67.9 |
| 12 | 74.8 | 73.2 | 71.6 | 70.7 | 69.7 | 69.1 |
| 12.5 | 76.0 | 74.5 | 72.9 | 71.9 | 71.0 | 70.4 |
| 13 | 77.3 | 75.7 | 74.1 | 73.2 | 72.3 | 71.6 |
