FINE JEWELLERY

HOW TO FIND YOUR RING SIZE

Ring sizing can be confusing! We've created this guide to assist you in determining your size, however we highly recommend heading into your local jeweller and getting sized in-person.

Most of our rings can be resized, however this can vary depending on the ring. If you have any questions please reach out to us at info@sarahgardnerjewellery.com

You can also download "ring size by Jason Withers" on the Appstore or follow our guide below.

METHOD 1 - Measure an existing ring

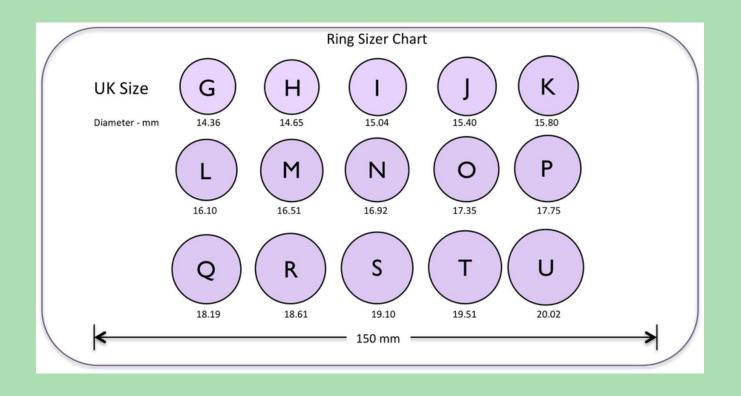

The easiest way of working out your own ring size is to measure the diameter of a ring you already own. Keeping in mind your fingers are different sizes, so it's important to measure a ring that fits the finger you're looking to purchase for.

1. Print this page and set the scale to 100%. Please keep in mind this will not accurately work on screen and needs to be printed.

MEASURING A RING 2. Select a ring that properly fits the intended finger.

3. If the ring falls between two sizes, you will be a half size (i.e. between K and L is a K and a half).

* We cannot guarantee that the ring sizing guide will be accurate. We highly recommend getting sized by a local jeweller.
