

PARTS

| Neckpiece x1 | Neckpiece Gasket x1 | Base x1 | Downstem Gasket x1 | Downstem x1 | Glass Bowl x1 |
|---|---|---|---|---|---|
|  |  |  |  |  |  |

ASSEMBLY

1. Unpack all parts. Ensure the Downstem Gasket is oriented correctly in the Base. An upside down gasket can cause a gap that leaks air.

2. Unwrap and assemble the Downstem. Insert the Downstem into the Base, pushing it in until flush with the Downstem Gasket so there are no gaps.

Important: If the Downstem touches the inside of the Base, remove one piece to avoid damage to the ceramic interior.

3. Fill the Base 2/3 with ice to the internal "fill line," then fill with water to the top of the ice.

4. Ensure the Neckpiece Gasket is in place and attach the threaded Neckpiece to the Base in a clockwise motion. Turn until air tight.

5. Insert the Glass Bowl in the Downstem and fill it with your favorite product.

CLEANING

 **WARNING: NEVER USE CLAY-BASED CLEANERS, CHEMICAL CLEANERS, OR ROCK SALT FOR CLEANING! THESE COULD DAMAGE THE CERAMIC INTERIOR AND CAUSE CORROSION.**

1. Remove the Glass Bowl, disassemble the Downstem, and soak both parts in 70% isopropyl alcohol.

2. Separate the Neckpiece from the Base and thoroughly rinse both with room temperature water to remove any loose material.

3. Pour a generous amount of 70% isopropyl alcohol into the Base. Cap both holes and shake the Base vigorously to remove any stubborn resin. Pour out any additional loose material from Base.

4. Using an alcohol wipe or paper towel soaked in 70% isopropyl alcohol, wipe out the top of the Base and the inside of the neckpiece. Also wipe clean Downstem Gasket and Neckpiece Gasket.

5. Rinse the Base, Neckpiece, Glass Bowl and Downstem thoroughly with room temperature water until clean. Let all parts dry and make sure alcohol is evaporated before using again.
