

## List of items for Cooler Tracks installation

### Tools

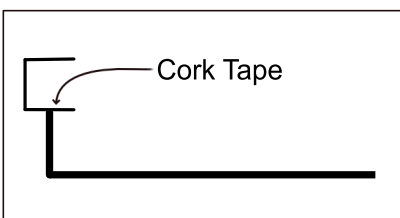

- Drill
- 1/16 inch diameter drill bit
- Philips screwdriver
- Painters tape (or any tape that won't leave residue)

### Components

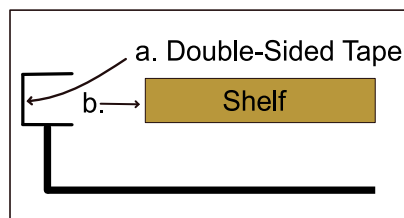

- Cooler Tracks (included)
- #6 x 5/8" screw (included)
- Adhesive cork strip (included)
- Can cooler (for spacing)

## Installation Instructions

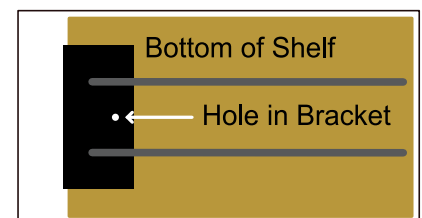

### ① Fit Tracks to shelf

### ② Tape Tracks to shelf

### ③ Screw Tracks to shelf

- 1. Fit Tracks to shelf.** If needed to fit thinner shelves, attach adhesive cork strip (included) to inside of bracket.

**Determine location for Tracks.** The bars hang below the shelf. Remember to leave enough space on each side for the can coolers.

- 2. Tape Tracks to shelf.** Remove the liner from the double-sided tape (a) inside the front of the bracket and slide Tracks onto shelf (b), pressing to adhere.

- 3. Screw Tracks to shelf.** Using a 1/16" diameter drill bit (not included), drill a 1/2" deep hole through the hole on the bottom of the bracket. Attach using #6 x 5/8" screw (included). **Do Not Over Tighten.**
