

## Focusing Framing Projector

### Display Light Accessory

| Model | Finish               |
|-------|----------------------|
| FP-K  | BK Black<br>WT White |

Example: **FP-K-BK**

#### DESCRIPTION

Attaches to the end of compatible luminaire. Creates a square or rectangular light area to illuminate artwork or displays. Frames a crisp edge with no light spillage, making paintings look as if they are self-illuminating. The best effect is achieved with low level ambient light and distances less than 10'. A framing projector is the perfect solution for art galleries and areas that require illumination with precise areas and clean edges.

#### FEATURES

- Frames a crisp edge with minimal light spillage
- Gives artwork a self-illuminating appearance
- Uses four shims to create a square or rectangular light area
- For use with models WTK-4023, H/LJ-2020, HM1-2020, MO-2020, MO-4023
- 5 year warranty
