SAVE THESE INSTRUCTIONS!

Install the Fixture

- 1 Determine desired length of fixture using the provided stems and assemble them by screwing them together.
- 2 Feed the fixture wires through the stem assembly and screw it to the fixture.

- 3 Leave 6" of the wires behind the canopy for power connections. Cut the excess wire.
- 4 Strip the end of the wires.

- 5 Feed the fixtures wires through the collar nut, plate, and canopy (in that order), then carefully slide them down the stem assembly. **NOTE: Use caution when sliding the collar nut and/or canopy up and down the stem as it can become scratched.**
- 6 Feed the fixture wires through the mounting plate, then screw the mounting plate onto the stem assembly.

- 7** Connect the fixture to a suitable ground in accordance with local electrical codes.
- 8** Connect the white fixture wire to the neutral power line wire with a wire nut.
- 9** Connect the black fixture wire to the hot power line wire with a wire nut.
- 10** Secure the mounting plate to the junction box using the provided junction box screws.

- 11** Neatly place all wires and wire nut connections inside the canopy.
- 12** Place the canopy onto the mounting plate and secure it in place by screwing the collar nut onto the threaded collar.

Install the Lamps and Glass

2A

CAUTION: To reduce the risk of a burn or electric shock during re-lamping, disconnect the power to the fixture.

Refer to fixture marking for lamp information.

- 1 Screw the lamps into the sockets.
- 2 Install the glass by gently screwing them onto the bases on the fixture arms. **Do not over-tighten.**
