Installation Instructions for Tie Stix Wall 2-Light Tunable White with Remote Power

TXW2R-__-2K4K-__

IMPORTANT INFORMATION

- This product is ETL listed.
- This instruction shows a typical installation.
- This product is wall mount only.
- The 4SQ version mounts to a standard junction box with plaster ring or octagon box.
- The 1RE version mounts to the provided Slim Profile Junction Box.
- The 2RE version mounts to a single gang box.

SAVE THESE INSTRUCTIONS!

Section One: 4SQ Version

NOTE: Before beginning any electrical work, ensure that the power to the junction box is off.

- 1:** Remove the two #4-40 screws from the canopy using a 1/16" Allen wrench to remove the crossbar.

NOTE: Omit steps 2 through 6 if using dimming module for two channel controls. Refer to wiring diagram on page 6.

- Use the "Low Voltage Wire Size Chart" on Page 2 to determine proper wire size connecting to the DMX controller terminals.
- Run the proper size red, black and white wires from the fixture to the power supply enclosure.
- Connect the red fixture wire to the red "+" DMX terminal and tighten the screw.
- Connect the black fixture wire to the red "-" DMX terminal and tighten the screw.
- Connect the white fixture wire to the green "-" DMX terminal and tighten the screw.

100W, 24VAC LOW VOLTAGE WIRE SIZE CHART					
3% VOLTAGE DROP	WIRE LENGTH IN FT	UP TO 31FT	32FT-49FT	50FT-81FT	82FT-124FT
	WIRE SIZE	14 AWG	12 AWG	10 AWG	8 AWG
	VOLTAGE AT END OF THE WIRE	23.28 VAC	23.29 VAC	23.28 VAC	23.28 VAC

7: Feed the wires coming from the DMX controller or dimming module through the center hole of the crossbar. Refer to the instructions provided with the power supply.

8: Align the crossbar tabs vertically and mount the crossbar to the junction box holes with the two #8-32 screws provided.

9: Refer to the wiring diagrams on pages 5 and 6 to connect the wires properly.

10: Place all the wires and wire connections inside the junction box.

11: Place the fixture against the crossbar and secure it with the provided #4-40 screws using a 1/16" Allen wrench.

Section Two: 1RE Version

NOTE: Before beginning any electrical work, ensure that the power to the electrical box is off.

- 1:** Mount each adjustable mounting bar to one side of the junction box and secure them with the provided mounting brackets and two Phillips screws.

NOTE: Adjustable mounting bars mount to studs that are spaced 15" to 25" apart. If the span needs to be shorter than 15", then break the bar arms from dedicated lines.

- 2:** Place the adjustable mounting bar tabs between the studs. Secure the adjustable bars to the studs with the #8 screws.

- 3:** Remove a knockout to install a conduit into the junction box. Install conduit(s) (if required by local electrical code).

- 4:** Run the wires coming from the DMX controller (refer to Drawing B, steps 2 through 6 on page 1) or dimming module for two channel controls to the junction box.

- 5:** Mark the rectangular junction box opening shape on the drywall where the junction box will be located.

- 6:** Cut out the marked rectangle opening, using a "Dremel Multi-Max" with the "wood & drywall" cutting bit.

- 7:** Install the drywall and plaster around the junction box. Sand and then paint.

- 8:** Feed the wires of the channel through the goof plate.

- 9:** Place the provided goof plate (paint to match prior) onto the Tie Stix channel. Secure it with the two 1/2" #6-32 socket head cap screws using a 7/64" Allen wrench (provided).

10: Feed the wires from the channel through the mounting plate.

11: Refer to the wiring diagrams on pages 5 and 6 to connect the wires properly.

12: Place all the wires and wire connections inside the junction box.

13: Place the mounting plate into the junction box. Secure it with the two Phillips screws.

14: Insert the socket head cap screws into the opening of the mounting plate, then slide sideways to lock in place.

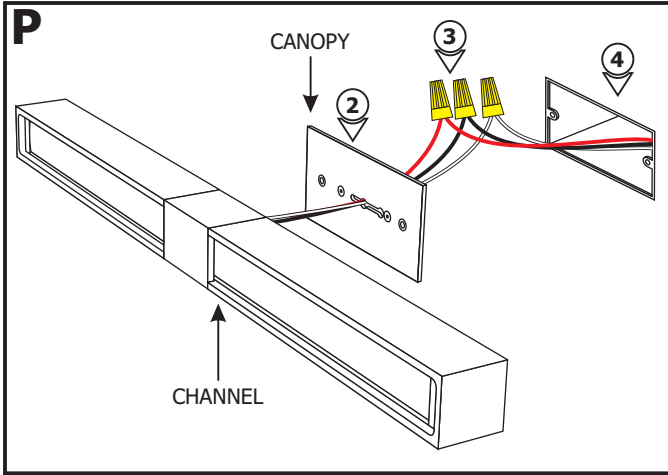

15: If the drywall is thicker than 3/4", use the two 1" #6-32 socket head cap screws (provided) for the goof plate with a 7/64" Allen wrench.

Section Three: 2RE Version

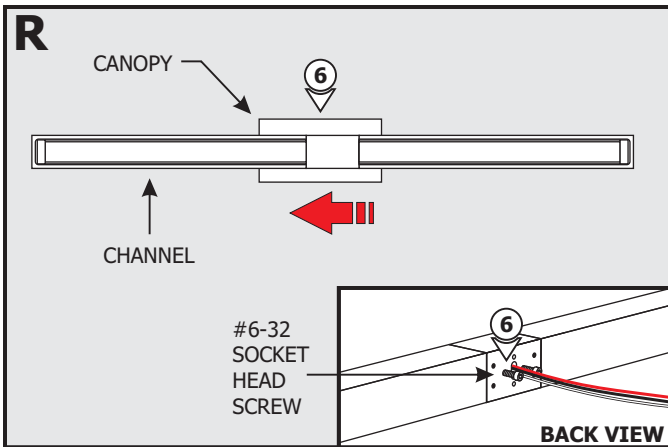

NOTE: Ensure single gang box is oriented horizontally.

1: Run the wires coming from the DMX controller (refer to Drawing B, steps 2 through 6 on page 1) or dimming module for two channel controls to the gang box.

- 2:** Feed the wires from the channel through the canopy.
- 3:** Refer to the wiring diagrams on pages 5 and 6 to connect the wires properly.
- 4:** Place all the wires and wire connections inside the gang box.

5: Place the canopy onto the junction box. Secure it to the junction box with the two Phillips screws provided.

6: Insert the socket head cap screws into the opening of the canopy, then slide the channel sideways to lock in place.
