INSTRUCTIONS FOR MOUNTING FIXTURE OUTDOORS AND/OR IN WET LOCATION:

1. Mounting surface should be clean, dry, flat and 1 1/4" (1.25") larger than backplate on all sides. Any gaps between the mounting surface and backplate exceeding 3/16" should be corrected as required.
2. With silicone (ex. GE-108) caulking compound, caulk completely around where back of canopy/fixture base meets the wall surface to prevent water from seeping into outlet box.
