

DELTA

Your Connection to Powerful Solutions

1-800-272-8350

Electric Motors & Power Transmission

Delta Electro Power is the total package for all your electric motor and industrial power transmission needs. No matter the industry, Delta Electro Power's solution-based approach saves customers time and money. Our electric motor and power transmission divisions are integrated with our pump and electrical divisions to provide a one-stop shop for our customers - allowing us to deliver turnkey system installation, repairs, and upgrades.

Our technicians and sales engineers average over 30 years of experience, meaning you get expert advice providing solutions that are right for you, regardless of how difficult your operation is. Delta Electro Power has the capability to respond quickly and efficiently to all your 24/7 emergency repair or replacement needs to provide more uptime solutions for all your applications.

Delta Electro Power is an owner managed business serving the New England market since 1977. We treat our clients like family, caring for your needs and providing the level of service that we would want to receive ourselves.

Electric Motors Sales & Service

In 1977, Delta Electro Power entered the electric motor repair and sales market. Since then, we have provided the highest quality repairs and sales of electric motors from industry leading manufacturers. From motor rewinding to shaft repair and machining, we have the comprehensive solutions our customers need. Our goal is simple, provide the best service and build lasting relationships with our customers.

- ◆ Electric motor rewinds
- ◆ Electric motor removal / installation
- ◆ Bearing replacement
- ◆ Motor condition monitoring
- ◆ Bearing seat repair
- ◆ Shaft repair
- ◆ Shaft grounding devices
- ◆ AC / DC electric motor sales
- ◆ Laser alignment
- ◆ Balancing
- ◆ Service agreements
- ◆ Preventive maintenance planning

Gearbox Sales & Service

Delta Electro Power's expert team is your best bet to solve any gearbox issues or to design optimizations. We handle gearbox repair, removal, and replacement to more advanced design engineering for special mixer gearboxes. Our team can also troubleshoot and provide recommendations for more efficient equipment, leaving you better off than where you started.

- ◆ Gearbox removal, repair, and installation
- ◆ Bearing replacement
- ◆ Bearing seat repair
- ◆ Shaft repair
- ◆ Engineering services
- ◆ Gearbox condition monitoring

Power Transmission Components

Delta Electro Power knows that uptime is the key to a successful business. Our Sales Engineers are always ready, willing, and able to provide our customers with replacement parts from roller chain sprockets to synchronous belt drives. If it's just replacement parts or re-engineering a problem application with a more efficient option, Delta Electro Power has the capability to provide customers with solutions to keep their facilities up and running.

- ◆ Roller chain and sprockets
- ◆ V-Belts and V-Belt sheaves
- ◆ Synchronous drives
- ◆ Couplings
- ◆ Engineering services
