Your Connection to Powerful Solutions

1-800-272-8350

## Electrical Services

Delta Electro Power's electrical division is your solution for all of your industrial electrical contracting needs. No matter the industry, Delta Electro Power's solution-focused approach helps clients save time and money. Our electrical division is integrated with our electric motor, pump and power transmission teams to provide a one-stop shop for our customers - allowing us to deliver turn key system installation, upgrades, and repairs.

Our licensed electricians average 25 years of experience per team member, meaning you get expert advice providing solutions that are right for you, regardless of how difficult the project is. With our 24/7 emergency service, you'll never need to wait to get your power back up and running.

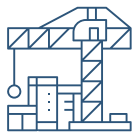

Delta Electro Power is an owner managed business serving the New England market since 1977. We treat our clients like family, caring for your needs and providing the level of service that we would want to receive ourselves.

## Industries Served

**Bio-Pharm & Pharmaceutical**

**Construction**

**Engineering**

**Food & Beverage**

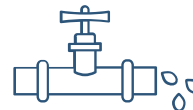

**Government**

**Hospitals**

**Schools & Universities**

**Waste & Municipal Water**

**Delta's response time is unmatched.**

Their technical acumen of general electrical in addition to advanced controls, coupled with their focus on quality is why they're a key partner.

- Todd Dione, Igus Inc.

# Facility Electrical Maintenance and Expansion

Our licensed electricians are equipped to deliver preventative and predictive maintenance plans as well as electrical repair for all electrical components and electrically powered equipment. Our focus is to keep your facility open, your factory running, and your processes moving.

- ◆ Service agreements
- ◆ Troubleshooting
- ◆ 24/7 emergency repair
- ◆ Thermography
- ◆ Generator installation and maintenance
- ◆ Electric motor analysis
- ◆ Remote condition monitoring for electric motors, pumps and power transmissions (via app and cloud)

# Lighting Upgrades / Retrofits

- ◆ Improved quality of light
- ◆ Lower energy consumption
- ◆ Reduced carbon footprint
- ◆ Utility rebates (based on availability)

# Systems Integration: Design, Build, and Installation

Our team can design, install, configure, program, and repair control systems and components for a variety of equipment from manufacturing to wastewater, regardless of industry.

- ◆ Control panels
- ◆ Variable frequency drives
- ◆ Generators
- ◆ PLCs
- ◆ Soft starters
- ◆ Harmonic filters
- ◆ Transformers
- ◆ Power systems

# Power Quality Analysis

Get a full picture of your power usage and electrical systems' efficiency with a power quality analysis from Delta Electro Power. Our licensed electrician will set up monitoring equipment for a predetermined timeframe and results will be analyzed by an electrical engineer. The deliverable will be a report which highlights problem areas and provides you with recommended actions to improve efficiency and power quality.

- ◆ Initial On-site Assessment
- ◆ Site Audit Report
- ◆ Thermography
- ◆ Corrective action proposal and execution

# Data Wiring

- ◆ Cat 5, Cat 5e, Cat 6, Cat 6a, Cat7
- ◆ Server racking and cabinets
- ◆ Fiberoptics, including fusion connections

Delta Electro Power partners with manufacturers that meet or exceed our stringent quality and reliability standards. Below are a few of the recognizable brands we source to meet our customers' needs:

**Schneider Electric | Eaton | Burndy | Cooper Solutions**  
**Acquity Brands | ABB | Lenze | Teco-Westinghouse**
