MANINAM M113 SUPER FAST USB C CAR CHARGER

MANINAM is pioneer in building high quality Turbotive chargers. Our Turbotive chargers are equipped with advanced technology that excel in turbo fast charging performance. Our chargers are also designed to provide maximum compatibility across a wide spectrum of devices while preserving the battery life. This is why we call them Turbotive, the combination of "Turbo" Charging and "Adaptive" Performance.

THE M113 MODEL uniquely charges your Samsung Galaxy S21 Note 20 S20 S20+ Ultra 5G Note10+ Plus at full 45W [Super Fast Charging 2.0] while it fast-charges iPhone 12 11 Pro Max at 18W

TURBO CAR CHARGER

With 73 Watt Total Power, this charger is the Most Powerful USB-C Car Charger to empower you to charge almost any portable electronic device while traveling by car. On the USB C port, you get access to up to 55 Watt on PPS and 45 Watt on PD 3.0 technologies which are adaptive fast charging. On the USB port, you get 18 Watt Qualcomm Quick Charge 3 which enables you up to 4X faster charge for phones like iPhone 11. Ports do not share power and you get 55W + 18W total 73W power.

SUPERIOR PPS / PROGRAMMABLE POWER DELIVERY SUPPLY

Latest Most Adaptive Fast Charging Technology - It can match the feeding rate to the device's appetite rate in high accuracy by dynamically and real-time changing the voltage in 0.02V increments. You will be surprised how it will fast-charge from small electronic devices like [Camera, Nintendo, phone, iPad Pro, tablet to larger devices like Laptop, Apple MacBook Pro, Air, Pixelbook, Chromebook, HP, and even a 17 inch LG Laptop, etc]

HEAVY-DUTY METAL SHEET

When you need higher power, you need a bigger chip, but you need to dissipate more operational heat. To increase heat dissipation compared to plastic, and to keep the shell small, we used aluminum alloy. Plus, using PPS, we could decrease the operating temperature for 3° degrees, turning more energy to battery charge than wasted heat. So you won't need large power inverters anymore to charge your laptop in cars!

SUPER FAST CHARGING 2.0 FOR SAMSUNG GALAXY NOTE 20 S21 S20 ULTRA NOTE 10 PLUS

The only charger capable of full 45W charging speed. A great option for Taxi, UBER, and Lyft drivers who drive long hours and looking for a durable and premium quality car charger. Don't Forget This ROAD TRIP Essential.

LIFETIME WARRANTY

As a USA-based company, all MANINAM Products come with 90 days money-back guarantee, lifetime replacement warranty, and friendly customer service local in the USA.

2 PORTS IN 1

This high-performance car charger features 2 independent charging ports that you can use simultaneously – each one delivering high amounts of power to charge 2 devices right away.

USB-C port that delivers up to 55W of charging power on PPS and up to 45W of charging power on PD 3.0 with adaptive fast charging.

USB-A port that dishes out up to 18W of Qualcomm Quick Charge 3 charging. This port can fast-charge iPhone 11 series smartphones at lightning-fast speeds.

FAST CHARGE ALL YOUR DEVICES

This high-powered car charger is well-equipped to fully charge all your electronic devices. Use it for topping up the battery level of your smartphone, laptop, camera, power bank, handheld gaming console, Bluetooth headset, and much more – as long as its battery voltage is below 21V.

A UNICORN
CAR CHARGER
WITH
OUTSTANDING
PERFORMANCE
IN ANY ASPECT

ULTIMATE POWER:

With 101W total power, it is the most powerful USB C Car Charger with 3 ports

Benefit: Charge 3 large devices (one 17 inch large laptop and two large tablets) at the same time without losing charging speed on each port. Basically having this charger in your car or truck will eliminate any need to any other power source because it can supply a very high power to cover the largest devices, and also it is highly adaptive/universal in a safe way

SAFE AND FAST:

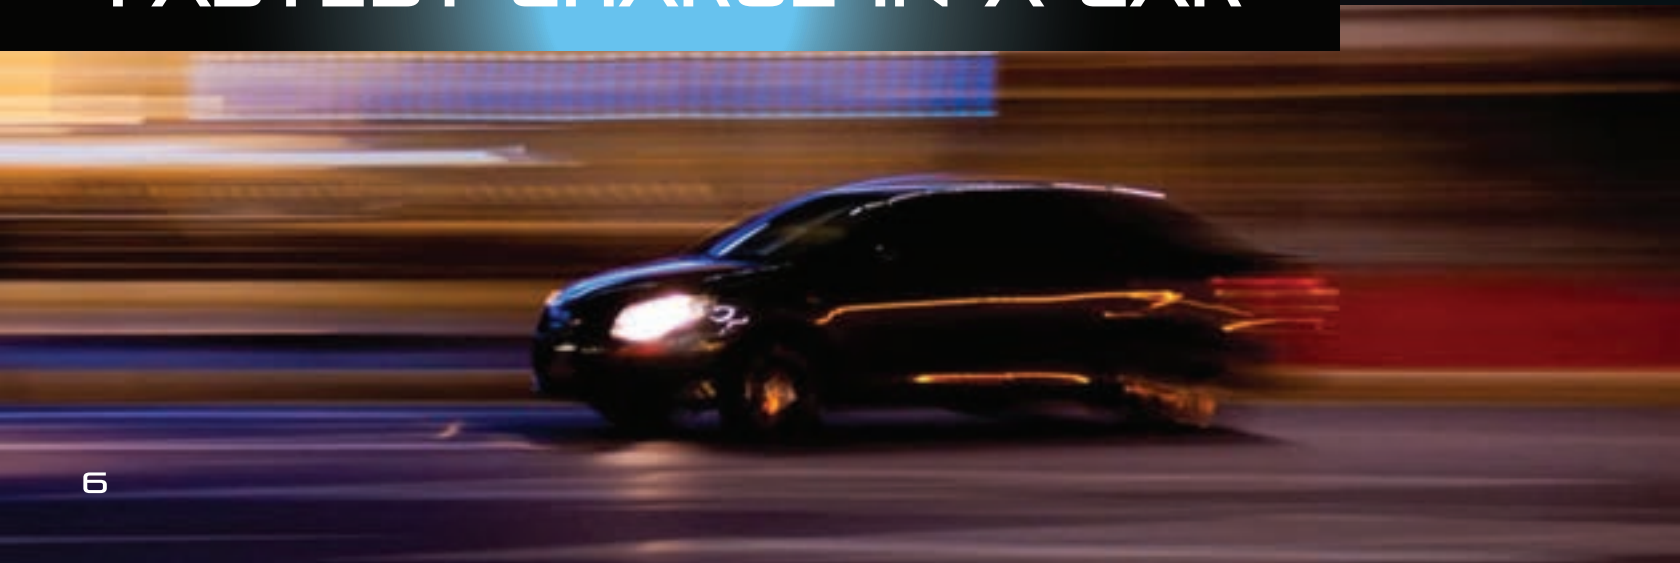

Using PPS (TURBOTIVE) Charging Technology

USB Type C Car Charger with Fast Charge refills your iPhone and Android devices up to 4 X faster at top speed meaning your phone battery can go from 0% to 100% in little over 30 minutes.

This charger uses the latest advanced technology PPS, developed by the USB-IF organization. PPS is the abbreviation of Programmable Power Supply which is a smart charging protocol uniquely able to regulate the charging voltage to match the battery voltage in 0.02 volt increments. This technology can manage the charging power in such a way that the charger will supply exactly as much as the device battery demand is. This allows the device gets charged at its maximum defined speed by the device manufacturer. As a result, it minimizes the damages to the battery by overcharging it.

FASTEST CHARGE IN A CAR

UNIVERSAL:

Adaptive Charger to universally charge any device that you may think of on your road!

Allows you to fast charge 3 devices simultaneously, so you can have your laptop, tablet and phone all ready before you arrive at your destination. With PPS tech and 3 ports in different type of USB C and USB With 65W high charging power in the TURBOTIVE USB C Port, you can charge any device by using a compatible USB C cable. From small AirPods Headphones to large laptops such as 15-in MacBook Pro and 17-in LG laptops at similar speed defined by the manufacturer. Not only compatible with Apple but also Dell, LG and many other brands.

SAFETY:

Your Phone, Car And Family Safer Than Ever

Better Battery Health: Programmable Power Delivery Supply safeguards your phone battery's health by complying with all leading charging standards including MagSafe.

Save Your Car Battery & The Planet - Aluminum shell protects your car battery from over-drain by trapping heat and converting that into charging energy.

Safety First: Advanced built-in protection layers safeguard against overcurrent, over-temperature, overvoltage, short-circuit and EMI to protect your devices and your car.

Wide Operating Temperature Spectrum

With a working temperature range of -10° to 50°C , this charger can keep working seamlessly and charge all your devices lag-free in any environment.

ENGINEERING DESIGN:

Designed for Ultimate Durability

Most of the time, the electronic components fail to operate because of overheating issues. In this design, we used a metal shell on the areas that are not exposed to the touch of user skin (the area that goes in the socket). Metal has better heat dissipation characteristics allowing it to cool down faster. We also added lots of vents to let the heat dissipate better from the electric components by letting air blow on the circuit board. This avoids the electronic parts getting hot and failing early.

HIGH QUALITY OF BUILT:

Made from combination of strong metal and PC material

Benefit: High mechanical strength that prevents any breakages in case of unintentionally pulling the cable. Strong springs that do not lose their stiffness over time to loosen the charge in the socket.

IMPOSSIBLY SMALL:

The most compact high power car charger relative to its competitors

It is important not to cause obstruction in the limited console and dashboard space. The competitors who offer the same charging power, have charger shell size and shape that make them obstructive in the limited space available in the car console or dashboard. People complain about the size but the M114 with 101W and 3 ports not only is smaller than competitors but also even slightly smaller than our M113 with 73W with 2 ports.

OPTIMAL LIGHTING DESIGN:

To find the USB Ports in darkness. Based on Customer Feedbacks over time

Some drivers are very much sensitive with intense lighting causing distraction at night drives. The competitors chargers lighting stays on constantly which some users get distracted from driving. In M114, there are is a dim light embedded in the USB Ports. This allows the user to see a dim light only when looking for the ports at dark. Whilst they plug in the cable, they won't see them because it is covered by the cable.

EXCELLENT GRIP:

To hold the charger in socket

There are many customers who complain about frequent disconnection issues. The user has to push the charger back again in the socket which is pretty frustrating especially when you are leaving your car with the expectation of a charged phone but you notice it is not charged.

FAVORITE AMERICAN BRAND:

A brand trusted by American Truckers' and Taxi Driver's
(based on our reviews and ad analytics)

Our products are made from heavy-duty materials which mostly exceeds even those who have high expectations. We never sacrifice quality and long-term customer satisfaction over temporary profit.

LIFETIME WARRANTY:

To keep our customers with us and exceed their expectations, we offer the highest level of warranty, Life-time Warranty. Our products are designed to last under heavy charging operations to withstand in the worst climate, long drives. But even if our product fails, we will ship a brand new product as many times as it happens during the lifecycle of the product to keep our customers happy for years. We do it through a very friendly fast customer service that is just as simple as scanning a QR Code.

MANINAM M132

22W WALL CHARGER

Compatible with iPhone 12 is a multi-hub outlet adapter with 2 ports for USB-A and USB-C cables. It is equipped with a dual fast charger, quick charge 3.0 and PPS technology. Additionally, this charger is efficiently designed as a compact block with foldable plugs.

COLOR

White/Black

SPECIAL FEATURE

Turbative Charging Technology can super-fast-charge your devices without damaging your battery.

BRAND

Maninam

COMPATIBLE DEVICES

Smartphones, Headphones, Tablets, Any USB C devices with voltage below 12V., Not designed for laptops but can charge MacBook Pro slowly in emergency needs., Cameras, Speakers, MagSafe Wireless Charger, Smartwatches

DIMENSION

1.81 x 1.42 x 1.26 inches

IPHONE 12 CHARGER ACCESSORIES TRAVEL KIT

This is another Super Fast Charger from MANINAM US-based startup to support Apple iPhone 12 owners who have high standards in charging experience, built quality, packaging, and love their accessories. A high-tech safe lightning-fast wall charger coming in a sharp leather case to organize the gadget clutter and save space in your travels.

CARRY ONE CHARGER IN CARRY-ON! 2 CHARGER BLOCK IN 1

By the coming travel season, you will need ONE compact travel wall charger with Dual-USB to save space in your suitcase. This will save your time by charging 2 gadgets at the same time in optimum speed of 18W distributed smartly between the ports.

EXTREMELY FAST - TURBOTIVE

0-50% in 23 min for iPhone 12, 11 with the USB C Port - This is faster than any other available. Turbotive is a trademark for MANINAM's Turbo Charging Technology - This technology allows the M132 to SAFELY maximize the charging speed by regulating the voltage to match the gadget battery standard voltage in 0.02 volts accuracy. So, it protects your battery by matching the voltages accurately while it fast-charges the device by pumping a high current.

EASY TO CARRY

This multi-hub charging block is compact, making it extremely portable. The prongs are also foldable so they don't snag at loose threads, cables or other items inside your bag.

A CHARGER YOU CAN RELY ON

Heavy-duty material to maximize durability. Charger stays firmly in place once it's plugged into the socket. Acquired UL certification for safety. Uniquely comes with a Lifetime Warranty

MANINAM M133

65W USB C

WALL CHARGER

MANINAM 65W wall charger, equipped with high-tech GaN chip, is a multi-hub outlet adapter with 3 ports, 2 USB-C and 1 USB-A. The charger covers a wide range of devices from Air pod to Macbook Pro and more, yet it comes at 40%

smaller than the competitors in the market. The beast can charge MacBook Pro 11 at the same charging speed as the original charger while its size is almost cut to half! Rest assured that this charger can charge multiple devices simultaneously at impressive speeds.

CHARGING TECHNOLOGY:

Another product by MANINAM with TUBROTIVE Charging technology offering extremely fast and adaptive charging experience.

UNIVERSALITY:

Covers almost any device from a small Air pod to Macbook Pro and more.

				
<ul style="list-style-type: none">• Small Electronic Devices• iPods• Headphones• Apple Watch• AirPods	<ul style="list-style-type: none">• iPhone 5, 5S, 6, 6S, 7• Any Samsung before S5 and S6 Models• Nintendo Switch• Canon Cameras• Power Banks	<ul style="list-style-type: none">• iPhone 11, 11 pro, 12, 12 pro, 12 max• Samsung S10, S10 Plus, S10e, S9, S8, S7• Google Pixel 3 and 4 XL• Samsung Note 10, Note 20,	<ul style="list-style-type: none">• iPad Pro• Galaxy Tab, Tablets• Samsung S21, S20• Samsung Note 10• OnePlus Pro	<ul style="list-style-type: none">• Any USB C Laptop• Any Macbook• Dell, Lenovo, Surface, LG, etc• Samsung Note 10• Any Battery Below 20V
5W	10W	25W	45W MAX	65W MAX

TECHNOLOGY AND SIZE:

1. Using high Tech GaN chip that allows 65W High power density in an extremely compact body housing (40% smaller). Even between competitor GaN Chargers, it is the smallest comparing regular chargers and even between GaN chargers.
2. Comparing the competitors the length of the charger is shorter, and the prongs have stronger strings that helps the charger stay in the wall better. The competitor chargers come off from the outlet due their long length
3. It has 91% efficiency comparing to 81% of the competitors. Means it juices to more charge rather than heat. So about 10% less energy consumption.

DESIGN:

- Foldable plug which makes it bag and pocket friendly
- Easy to carry when going outside, not stab pocket
- Matte finished design
- Not easy to be scratched
- Smooth touch feeling

DUAL APPLICATION (2 IN 1)

Convertibility to Desktop

Power Station / Wall Charger:

It comes with extension cable which can convert the wall charger to a desktop power station to place on the desk and avoid going under or behind the desk to plug and unplug the USB cables in the wall outlets. Unlike the competitor product, the charger benefits from wall prongs which allows the charger be used independently as a wall charger if the user disconnects the extension cable.

Also in cases that the outlet is too small to fit the large MacBook charger, this extension cable lets the small plug fit in the outlet and use the charger ports on the table for convenience.

MULTIPLE USB OUTLET:

With 2 USB-C and 1 USB-A, it charges 3 devices in fast speed safely either independently or simultaneously with optimized power distribution.

SAFETY:

Using PC V0 Fireproof high quality material for safer experience

2. Using high quality heat conductivity silicone gel which can help to transfer the heat from the component to the case outside to achieve the effect of uniform heat dissipation safely, while most other GaN charger in the market usually use cheaper heat sink inside which is not good enough to make the heat dissipation uniformly.

Comes with UL Certification which assures the product has been tested for safety from with accredited labs

STAYS FIRMLY IN OUTLET

GaN Chargers are relatively heavier comparing their sizes because they components are stored more densely in the small body shell. That's why they tend to come off from the Wall Outlets. Some competitors have this tissue Nit ours comparing the competitors the length of the charger is shorter, and the prongs have stronger strings that helps the charger stay in the wall better. The competitor chargers come off from the outlet due their long length

WARRANTY

It comes with Lifetime Warranty which very few companies offer such a customer success policy.

PACKAGING

It comes in various packaging:

- Single Charger + EVA Case
- Charger + Extension Cable + EVA Case
- Charger + Extension Cable + EVA Case + USB C Cable
