MIAMI

TECHNICAL DATA SHEET
MANGO ASEPTIC PUREE

NAME

EXTENDED SHELF-LIFE MANGO PULP

PRODUCT DESCRIPTION

Natural product, undiluted, not concentrated, not fermented, preservative-free, obtained from the disintegration and sieving of the edible fraction of the ripe, healthy and clean mango fruit. Naturally fat-free and cholesterol-free, low content in sodium, contains 100% fruit pulp.

COMPOSITION

Mango fruit, ascorbic acid

CONDITIONS UPON RECEIPT OF THE FRUIT

The vehicle (floors, ceilings, tarps, etc.) and the packages must be clean and in good condition, to guarantee the preservation of the desired characteristics of the fruit. Likewise, the personnel transporting the products must comply with the minimum food-handling requirements, such as cleanliness, refrain from using jewelry at the time of unloading, etc.

The raw material (fruits) arriving to the plant is selected by quality control to be received. Fruits are accepted at their optimum state of maturity, healthy, fresh looking and with a firm consistency, free of insect attacks and diseases impairing the internal quality of the fruit, free of any abnormal external humidity and of any strange odor and /or flavor. then fruits go through production for cleaning and disinfection. Non-compliance with any of the above-mentioned aspects can be cause of return of the raw material.

DESCRIPTION OF THE PRODUCTION PROCESS

At our plant, the pulps are processed in compliance with the Good Manufacturing Practices (GMP) and Hazard Analysis and Critical Control Point (HACCP), pasteurized, aseptically packaged and stored at room temperature. the thermal treatment guarantee the product's safety, keeping its organoleptic and nutritional characteristics. the whole operation is accomplished according to high quality standards and fulfilling current law.

ORGANOLEPTIC CHARACTERISTICS

Aroma: intense and characteristic of the ripe and healthy mango.

Color: intense and homogeneous, characteristic of the mango; can present a slight change of color due to the natural process of oxidation.

Flavor: characteristic and intense of the ripe and healthy mango. Free of any strange flavor.

Appearance: uniform, free of foreign matters, admitting a separation of phases and the minimum presence of pieces, dark particles inherent to the mango.

PHYSICOCHEMICAL CHARACTERISTICS

Soluble solids expressed as ° Brix: 15-20
pH: 3.60-4.30
Acidity expressed as % of citric acid: 0.30-0.70

MICROBIOLOGICAL CHARACTERISTICS

Commercial sterility test satisfactory - NTC 4433.

DECLARATION OF ALLERGENS

This pulp may contain sulphite traces, coming from the agricultural work to produce the fruit.

PACKAGING AND COMMERCIAL PRESENTATION

Barrier bags of 200g and 1000g

Plastic Preformed bags with filling valve (no dispenser lid) - from 10kg, 20kg y 200 kg

SHELF LIFE

On the polythene bag with high oxygen barrier, the shelf life is up to 6 months at room temperature.

For packing "Bag-in Box", the shelf life is up to 18 months at room temperature.

IDENTIFICACIÓN: LOT – TRACEABILITY

The lot is identified with its expiration date as follows: day (numbers), month (letters), year (numbers). On the bags with no valve, such identification is made using an indelible inkjet printer label. On the bags with a valve, such identification is made using a sticker. The fruit used in the pulp must also be identified. The lot is a code assigned by Alimentos SAS to guarantee its traceability.
