1. Product Description

1.1 Brief Description

This product is an Android-based network touch keyboard with a 10.1-inch capacitive touch screen and simple user interface. The integrated touch screen can provide real-time previews from camera feeds, and the system can output the image to an external display via HDMI. It supports single viewing of H.265 4K@30fps or H.264 1080p@60fps; and 4-channel 720p@30fps. The system includes a joystick for PTZ control, and is suitable for unified control where multiple network cameras are installed such as schools, hospitals, hotels, businesses, etc.

1.2 Features

10.1-inch capacitive touch screen

Android 6.0 operating system

H.265/H.264 decoding, up to 4 screen partitions

Supports viewing images on the touch screen or external display via HDMI

Network access to full range of PTZ cameras

PTZ control, preset, cruise, track setting and recall

Supports ONVIF protocol

Controls up to 1024 cameras

Supports external mouse

1.3 Keyboard Appearance

Left side button controls: Preset, cruise, scan and other programmable functions

Large middle screen area: 10.1-inch capacitive touch screen for operation and display

Right-side joystick control: PTZ control joystick (left/right/up/down/zoom) and customizable shuttle dial
