MEMORY GAME

Spread the cards facedown on the table.

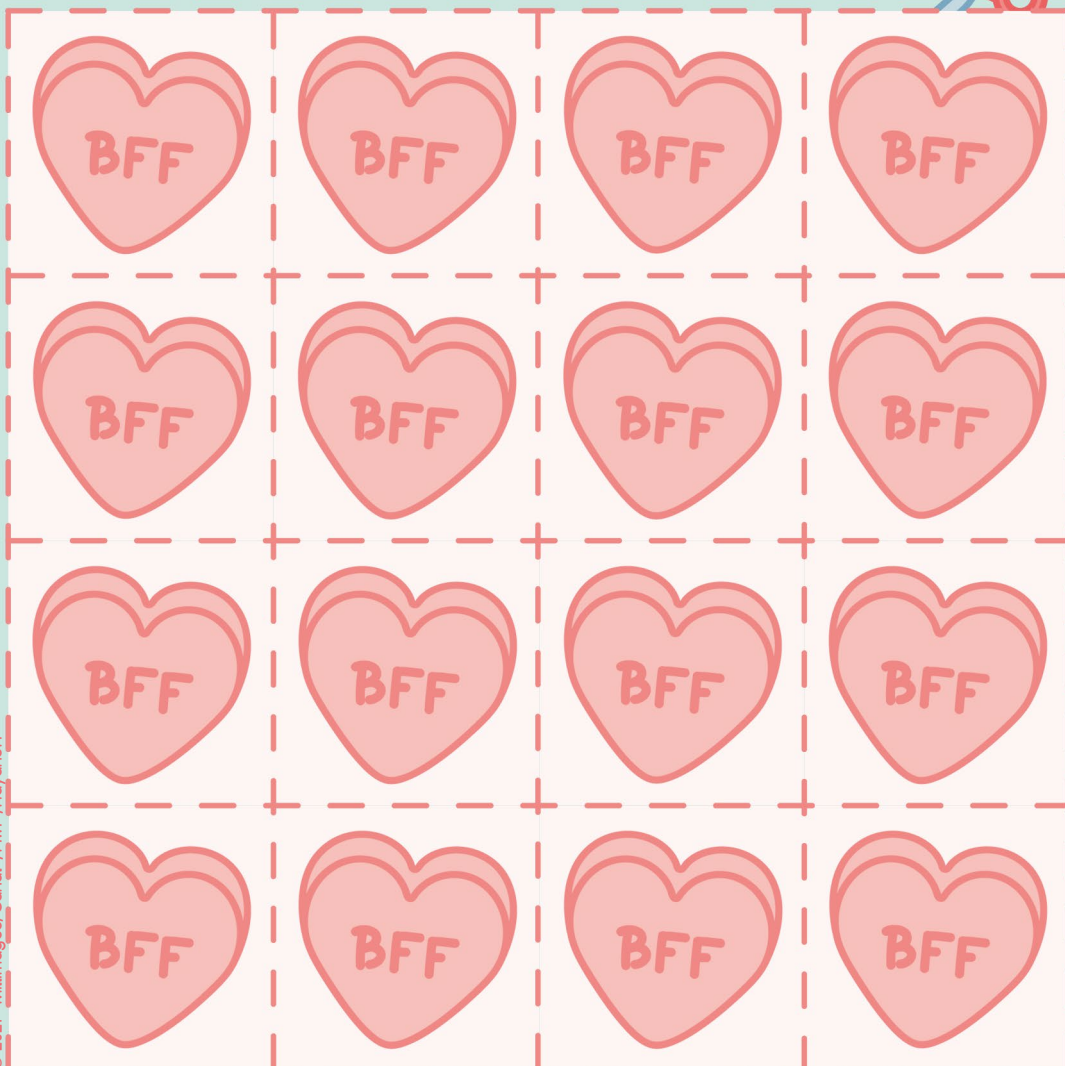

The first player turns over two cards. If both cards have the same image, the player wins the cards and can turn over two more.

If the two cards don't match, the player puts them back facedown in the same exact place they picked them from. The next player can now choose two cards from the spread.

The winner is the person who accumulates the most paired cards at the end of the game.

MAKE YOUR OWN FRIENDSHIP BRACELET

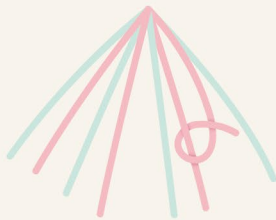

Choose two colors of string and cut four 60cm-long strings (two of each color).

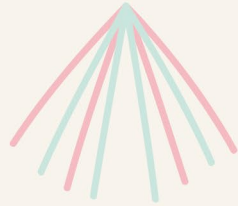

Place the strings side by side (with alternating colors) and make a knot at the top (leave out about 7cm of string at the end).

Take the left-most string and knot it around the string to its right as shown above (double knot it each time).

Repeat the same step (with the right-most string this time) on each string until you reach the middle string.

Tape the top of the string (before the knot) on a flat surface, and place the string as shown above.

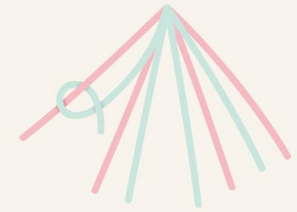

Repeat the same step on each string (from left to right) until you reach the middle string.

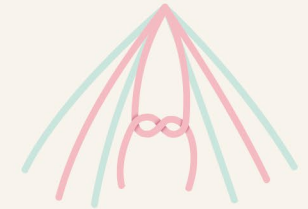

Tie the two strings in the middle together in a double knot.

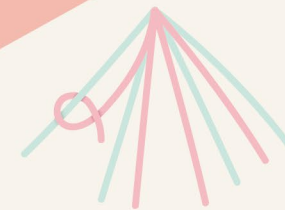

Repeat the steps with the two outermost strings.

Take the second string on the left side and tie a knot to the string to its left, and repeat the same step on the opposite side.

Repeat the same step on the opposite side and tie the two middle strings together in a double knot.

Repeat the three previous steps before repeating the first step, continuing until you reach the desired length to fit the person's wrist.

Finish the bracelet by making a tight double knot and cut off any remaining string. Your friendship bracelet is ready!
