

EFC-1

EC Fan Control Adaptor

The EFC-1 adaptor is specifically designed for TrolMaster's Tent-X control system. With the use of the EFC-1 adaptor, TrolMaster's Tent-X controller is capable of controlling most fan systems on the market. The EFC-1 uses low-volt control option in order to communicate with the Tent-X and allow the signals to pass through.

You can connect the EFC-1 adaptor simply by inserting the RJ12 cable into the devices line on the Tent-X Controller. Once you connect two EFC-1 adaptors, the Tent-X controller will automatically address the Exhaust Fan (F1) and Intake Fan (F2). You can also select whether your fan is an EC fan or a PWM fan by pressing the button on the adaptor itself. You can then connect the appropriate fans to each of the EFC-1 adaptors. This will then enable you to start controlling your fans using the Tent-X Controller.

Specifications

EFC-1

Input Voltage

Voltage	12V
---------	-----

Max Output: Voltage

Voltage	Output: 0-10V, PWM: 50mA
---------	--------------------------

Maximum Current

Current	0.1A
---------	------

Package Dimensions

Size	6.14"/156mm(L)x 3.27"/83mm(W)x 1.18"/30mm(H)
------	--

Gross weight	2.3oz / 67.2g
--------------	---------------

Working Environments

Temperature	32~122°F (0~50°C)
-------------	-------------------

Humidity	≤90%
----------	------

Package Contents

EFC-1 adaptor	1pc
---------------	-----
