A CONCENTRATED
SPRAY PROVEN TO
CONTROL MOLD,
MILDEW, MITES,
AND INSECTS

100% ALL NATURAL
INGREDIENTS

FUNGICIDE & INSECTICIDE

FORMULATED FOR PREVENTION
AND ELIMINATION

MAMMOTH CANNCONTROL

MAMMOTH CANNCONTROL IS A CONTACT AND VAPOR ACTION FUNGICIDE, MITICIDE, AND INSECTICIDE.

EXTENSIVELY TESTED

Lab and greenhouse tested by our Research and Development team and proven to prevent and eliminate: Powdery Mildew, *Botrytis* (Gray Mold), Mites, Aphids, Whiteflies, Thrips, Fungus Gnats

100% ALL NATURAL INGREDIENTS

Minimum risk pesticide leaves zero toxic residue on plants, which means it's safe for testing. Exempt from registration with the U.S. Environmental Protection Agency under FIFRA section 25(b) as a minimum risk pesticide.

TARGETED PROPRIETARY FORMULATION

Our formulation utilizes specific compounds found in thyme oil, which have been proven highly effective in fungus and pest prevention and control.

SAFE & COMPATIBLE

MAMMOTH CANNCONTROL is safe for use throughout the veg and bloom phases of plant growth.

TAKE CONTROL NATURALLY WITH MAMMOTH CANNCONTROL.

HOW TO MIX

1. Shake well before and after diluting.
2. For minor infestations, mix 1oz (30mL) Mammoth CannControl concentrate in 1 gallon of water.
3. For more severe infestations, mix up to 3oz (90mL) Mammoth CannControl concentrate with 1 gallon of water.

FOR BEST RESULTS USE FRESHLY MIXED SOLUTION.

Apply using an atomizer, misting system, or spraying apparatus. Read and carefully follow instructions for type of sprayer.

FOLIAR APPLICATION:

1. Use sufficient spray volume to achieve thorough coverage.
2. Agitate sprayer every 15 minutes to prevent product separation.
3. Cover both tops and bottoms of leaves and stems thoroughly. Saturate to point of run-off.

SOIL APPLICATION:

1. Mix 1oz (30mL) Mammoth CannControl concentrate in 1 gallon of water and apply to growth medium on a weekly basis.

WHEN TO APPLY:

1. Apply Mammoth CannControl to well hydrated plants once per week as needed. May be used during vegetative and flowering stages.
2. Spray late in the evening or on cloudy days, when plants are not exposed to direct sunlight or artificial lighting for at least 6 hours.
3. Use weekly to eliminate fungal and other pest pressure.
4. Re-entry Interval (REI) does not apply.
