NEW!

- ✓ MUSHROOM GROWING
- ✓ MUSHROOM GRAIN SPAWN
- ✓ MUSHROOM SUBSTRATE
- ✓ STERILIZED
- ✓ GROW-IN-BAG
- ✓ MONOTUB GROWING

While spending the better part of a decade working within the cannabis community, the **MUSHROOMSUPPLIES** team became increasingly obsessed with mycology and the healing powers that mushrooms have on our bodies and the planet.

The mission of MushroomSupplies is to take mushrooms to the next level by making mushroom cultivation accessible to everyone through superior products, online courses, instructional videos, and an online community.

AVAILABLE SIZES

3LB GRAIN BAGS, 5 LB SUBSTRATE OR SUBSTRATE/GRAIN ALL-IN-ONE

MUSHROOMSUPPLIES GROWING SUBSTRATE

Mushroom cultivators will appreciate this sterilized high yield manure substrate that contains all the nutrients needed to grow incredible mushrooms. This proprietary mix developed by a team of mycologists contains the perfect ratio of Premium Manure, Vermiculite, Coco Coir, and Gypsum needed for growing medicinal and dung loving mushrooms.

- ✓ Perfect for any manure loving mushroom
- ✓ A proprietary blend of Premium Manure, Vermiculite, Coco Coir, and Gypsum.
- ✓ Lab-quality bag with 0.2 micron filter for air flow

MUSHROOMSUPPLIES GRAIN SPAWN BAG

Growers can start mushroom cultivation on the right foot with this proprietary blend of perfectly hydrated sterilized millet and hardwood oak dust for extremely fast colonization and maximized yields. Unleash the full power of Lightning Colonization Tek™ – a proprietary blend of perfectly hydrated sterilized millet and hardwood oak dust for extremely fast colonization and maximized yields.

MIX 5 LBS OF SUBSTRATE FOR EVERY 3 LBS OF COLONIZED GRAIN.

HOW TO USE

1. Inject 10 ccs of spores or culture into the bag.
2. Store for a few weeks to fully colonize the bag of grain with mushroom mycelium.
3. Mix colonized grain and substrate in a monotub or grow bag.
4. Store until mixture is fully colonized.
5. Allow for air flow in your chosen environment.
6. Harvest mushrooms once they fruit.

AVAILABLE SIZES

3LB GRAIN BAGS, 5 LB SUBSTRATE OR SUBSTRATE/GRAIN ALL-IN-ONE

MUSHROOMSUPPLIES GROW KIT IN-A-BAG™ HIGH YIELD GRAIN & SUBSTRATE MIX

Developed by a team of mycologists, this mix is the optimal blend of sterilized millet grain and mushroom substrate fortified with all the nutrients mycelium needs. Millet is better than other, cheaper grains such as rye berries because its size maximizes the surface area for mycelium to grow. The Substrate mixture contains the perfect ratio of premium manure, coco coir, vermiculite, and gypsum. Mycologists consider this blend the fastest colonizing mix on the market!

USAGE:

1. Inject bag with 10 ccs of liquid culture.
2. Shake bag when 50% colonized.
3. Harvest up to three flushes of mushrooms!
