

# SolarSystem UVB

## Nature Meets Technology.

### Features

- Supplemental UVB – 25 watts – T8 Fluorescent
- Improves resin development and potency in cannabis
- Used during the last few weeks of flowering
- Works with the SolarSystem Controller
- Piggy back design offers multiple light installation from a single outlet

The SolarSystem features the latest generation high output UVB T8 fluorescent bulbs as well as the most versatile control system on the market. This system is perfect for a single light in a tent or several hundred lights in a large commercial operation.

### Compatible with the SolarSystem Digital Controller

The SolarSystem controller puts you in control of your garden. A single controller can automate a single light in a grow tent or a 1000 light commercial operation and controls all the lighting products in the SolarSystem series. Maximize your yield while minimizing power consumption.
