SolarSystem UVB

WARNING: EXPOSURE TO UVB LIGHT CAN DAMAGE SKIN OR EYES. TURN LIGHT OFF BEFORE ENTERING THE ROOM – FOR USE ON PLANTS ONLY.

CAUTION: RISK OF ELECTRICAL SHOCK. USE IN DRY LOCATIONS. NOT TO BE USED ON A DIMMER CIRCUIT. USE ONLY SOLARSYSTEM T5 UVB BULB.

INSTRUCTIONS

1. Carefully remove components from box and protective foam and ensure that your T5 Fixture box includes the following:
 - SS UVB fixture
 - SS UVB bulb
 - 6' daisy chain cord
 - Power cord with on/off switch
 - Eye hanging hook clips x 2
2. Inspect the included components for any damage, missing parts, or other concerns. Contact your store in order to get a replacement or new part if required.
3. If there is a protective film on the reflector surfaces, be sure to remove it completely prior to installing the bulbs.
4. Before installing the SS UVB remove cardboard and inspect the socket end on the fixture to be sure it is ready to receive the pins on the tube ends. Gently align the pins vertically upon inserting in each socket and once all the way down, gently rotate to seat the pins into a horizontal orientation. You should hear a small click once the bulb is locked into place.
5. To hang fixtures using hooks, install the eye hanging hook clips onto fixture.
6. To adjust height, determine proper chain link and attach to hanger clips. The fixture will cover roughly a 4' x 4' area at 24" from the top of the plant canopy.
7. Plug the grounded electrical cord (provided) into 110v-130v, 60Hz outlet.
8. Multiple units can be chained together using the supplied daisy chain cord.
Do not chain more than 10 UVB units together.
9. Use switch on power cord to turn unit on and off.
10. Do not use with dimmers.
