

Beyond LED's FORTE wall pack is the newest, most innovative and feature rich product of 2023. It offers 4 Adjustable wattages and 3 Adjustable CCT with energy-efficient LED technology. FORTE comes with Built-in photocell. FORTE luminaires comes with die cast aluminum housing and glass lens to stand up for many years of punishing environmental conditions.

Product Features

- Up to 130 Lumens per watt
- 4 Adjustable Wattages 30W/60W/90W/120W
- 3 Adjustable CCT 3K / 4K / 5K
- High efficiency Lumileds 2835
- IP65 Rated

- Input voltage 120-277VAC
- 0-10V Dimmable
- Glass Diffuser
- Built-in Photocell
- UL & DLC Listed
- 5 Year warranty

FORTETM

156703 WP09-120L-CSP-3CCT

30W/60W/90W 120W Max 15600Lm

3K/4K/5K IP65

Bronze 120-277V

UL & DLC

SKU: 156703

Specifications

Parameter	Description	Value	
General Performance	Model #	WP09-120L-CSP-3CCT	
	Wattage Adjustable	30W / 60W / 90W / 120W	
	Lumen	15600LM	
	Lumen Efficacy	Up to 130LM/W	
	Color Temperature	3000K / 4000K / 5000K	
	CRI (Ra)	>80	
	Beam Angle	102° Degree	
	Diffuser Type	Glass Lens	
	Input Voltage	120-277Vac	
	Frequency	50/60Hz	
	Dimming	0-10V	
Electrical	Power Factor	≥0.95	
	Driver Surge Protection	L-N: 2KV, L/N-PE: 4KV	
	Driver Brand	BQ	
	Driver Model	BQE120A-130	
	Flicker Percent	≤30%	
	Operating Temperature	-30°C To 45°C	
	Operating Humidity	5%RH To 95%RH	
	Storage Temperature	-40°C To 80°C	
	Storage Humidity	5%RH To 95%RH	
Physical	LED Brand	LUMILEDS	
	LED Type	SMD2835	
	LED QTY	392 PCS	
	IP Rating	IP65	
Qualification	Housing	Die-cast Aluminum	
	Housing Color	Bronze	
	Warranty	5 Year

Installation

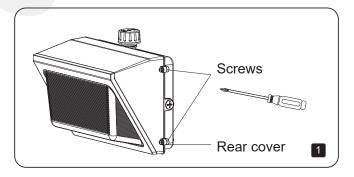

IMPORTANT SAFEGUARDS

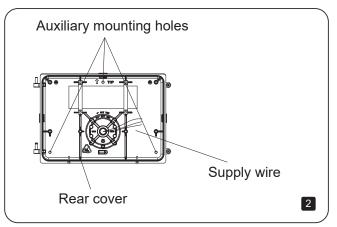

When using electrical equipment, basic safety precautions should always be followed including the following:

READ AND FOLLOW ALL SAFETY INSTRUCTIONS

- 1.To reduce the risk of electrical shock, turn off the power supply before installation or servicing.
- 2. This luminaire must be installed in accordance with the NEC or your requirements, consult a qualified electrician.
- 3.If NEMA photo control is installed refer to NEMA receptacle section For instructions.
- 4. Verify the availability of necessary tools and incidental material.
- 5. The fixture is not allowed to disassemble the structure or components.

TO INSTALL

LUMINAIRE INSTALLATION

STEP 1(Figure 1):

Remove two screws, remove the rear cover of the luminaire and pull the connector.

STEP 2-1(Onto a recessed 4" rectangular/octagonal J-Box) (Figure 2):

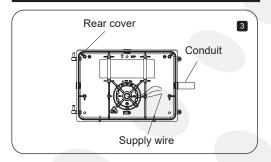

- 1. Verify that supply power is off and that the J-Box is securely mounted within the structural surface.
- 2.Remove both J-Box fasteners from j-box (set aside for re-installation as needed)
- 3.Drill holes as J-Box required on the rear cover.
- 4.Position rear cover over J-Box feeding supply wires through the center of the Rear cover and slit in gasket. Replace fasteners from step 2 (do not fully tighten).
- 5.Using a contractor level, ensure Rear cover is level and fully tighten fasteners (Use washers as required to ensure a secure fit).

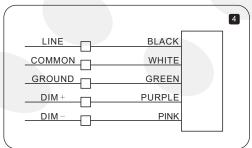

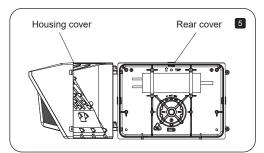

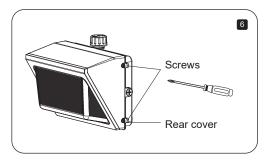

Installation

TO INSTALL

LUMINAIRE INSTALLATION

STEP 2-2 (Conduit-stub up) (Figure 3)

- 1. Drill holes on the rear cover as auxiliary mounting holes.
- 2. Verify that supply power is off. Using a contractor level, ensure rear cover is level and mark mounting surface thru selected auxiliary mounting holes.
- 3. Drill holes as marked in step 1 and install appropriate mounting inserts capable of handing fixture load requirements.
- 4. Feed supply wires through the center of the rear cover and slit in gasket.
- 5. Ensure rear cover is level. Fully tighten fasteners (use washers as required to ensure a secure fit).

STEP 2-3 (Conduit-surface) (Figure 3):

- 1. Drill holes on the rear cover as auxiliary mounting holes.
- Verify that supply power is off. Using a contractor level, ensure rear cover is level and mark mounting surface through selected auxiliary mounting holes.
- Drill holes as marked in step 1 and install appropriate mounting inserts capable of handling fixture load requirements.
- 4. Ensure rear cover is level. Fully tighten fasteners (use washers as required to ensure a secure fit).
- Attach ½"NPT conduit fittings using the appropriate EMT rain tight compre sion connections(not provided) onto the factory machined conduit entry opening.

STEP 3 (Figure 4):

Make supply wire (power and dimming) to fixture wire connections as required through splice access.

The voltage driver permits. Operation at 120V-277V, 120V-347V, 200V-480V, 50 or 60 Hz. 0-10V control wires must be rated for 300V minimum, for 0-10V Dimming.

Follow the wiring directions as shown in figure below.

STEP 4 (Figure 5):

Fixture slightly upward, align fixture housing indicators with rear cover hooks and slip fixture back onto hooks and insert the connector.

STEP 5 (Figure 6):

Close the housing indicators to the rear cover and fully tighten fasteners. The bottom shell is sprayed with glue and tightly sealed to the wall.

Trouble shooting: If this fixture fails to operate properly, check to make sure: The fixture is wired correctly. The fixture is grounded correctly. The line voltage at the fixture is correct. If all these variables have been checked and the fixture still does not operate as specified, contact your local distributor.

Pakaging

SKU	Size (Inches)	Qty / Carton	Net Weight / Carton	Gross Weight / Carton
