Use a fresh approach to the difficult problem of controlling offensive odors in sewage plants, lagoons, aerators, sewer mains and laterals and for garbage containers and dumps. DISPEL is a concentrated blend of wash active materials containing essential oils formulated to control odors. It also removes grease and sludge build-up from septic tank lines and systems.

Does not harm vegetation, birds or warm-blooded animals when used as directed. Ideal for the washing down of concrete and painted floors, walls, stairs and stairwells, garbage areas, etc.

It not only masks odors – it combines with them and eliminates them at the source.

DIRECTIONS

Sewage Disposal Plants – Make a solution of 1 part DISPEL to 50 parts water. Spray over entire surface of area to be deodorized at ration of 1 gallon DISPEL to each 20,000 gallons of sewage.

Drainage Ditches, Storm Sewers, Garbage Containers, Refuse Disposal Dumps, Garbage Trucks and Chutes – Use 2 to 4 fluid ounces of DISPEL per gallon of water and wash in normal way. Can also be used in rug shampooing solution.

CAUTION

In case of contact with eyes, flush with plenty of cool water for at least 15 minutes. If irritation persists, obtain medical attention.
