## **DUST PROOF**

• FAST AND EASY TO USE

## • USE IN SUMMER MONTHS TO CONTROL DUST ON

**GRAVEL ROADS** 

## • FOR USE ON PARKING LOTS, ROADWAYS, SIDEWALKS, OR OTHER FOOT TRAFFIC AREAS

**DESCRIPTION: DUST CONTROL** may be used in warmer weather to help control dust on gravel roads. By absorbing moisture from the air, it helps to keep dust down.

**DIRECTIONS:** Use 0.25 - 0.45 gallons per square yard to suppress dust on gravel and dirt roads. This use rate will draw moisture from the air to keep road surfaces constantly damp, even in arid environments. The moisture creates a hard and compact road surface, and because it penetrates into the road base, it will also contribute to road stability. By depressing the freezing point of the moisture in the road surface, it will help minimize frost heave damage in the winter.
