

DESCRIPTION

This product is a fluid chemical emulsion containing surface active agents to aid in bonding to pavement surfaces. It is stable to mix with clean sand and coarse aggregates for the preparation of surfacing or patching mixes and extensive dilution with cool, clean soft water for use as a priming and tack coat.

INTENDED USE:

Product is recommended for tack coating asphalt pavement surfaces whenever the bonding of pavement surface coating products is questionable. It is also used as the binder for mastic mixes for patching depressions in tennis courts and a binder for cold laid asphalt pavement.

SURFACE PREPARATION:

The surface upon which this product is to be applied must be smooth, free of dirt, loose or flaking paint, oil materials or chemical residues, vegetation of any sort and any other debris or foreign matter that may prevent the proper product adhesion.

GUIDE TO APPLICATION: Product must be applied with a mechanical sprayer or stiff bristle broom. Apply in a thin, uniform coating being careful to not allow pooling of the material.

COVERAGE: Coverage will vary with pavement texture. Figure 0.01 gallons of product per square yard (900 square feet per gallon).

CLEAN UP: All equipment can be cleaned with water if clean-up occurs immediately after application. Rinse water should be reserved for later use.

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Wear eye protection, protective gloves, protective clothing.

IF SWALLOWED: Call a doctor, a POISON CENTER if you feel unwell. Rinse mouth. **If exposed or concerned:** Get medical advice/attention.

Store locked up.
