

SURVIVORS

COMPLETE GREASE TRAP MAINTENANCE SYSTEM

BACTERIAL DIGESTANT FORTIFIED ENZYME SYSTEM

DUAL ODOR CONTROL

May be harmful if swallowed.
May irritate eyes.

KEEP OUT OF REACH OF CHILDREN

The continuous use of this digestant drastically reduces plumbing maintenance costs and reduces pump-out frequency, making it the ideal grease trap maintainer. It utilizes the latest biological technology to keep grease traps and drain lines free from clogs and foul odors. The facultative bacteria offer greater continuous digestion while its spore-form allows it to resist chlorine, disinfectants and high water temperatures.

This powerful digestant also contains special enzymes that immediately break down starch and complex carbohydrates to energize the bacterial replication of our five distinct bacterial strains. Unlike detergents that simply push grease into sewer lines, these bacterial strains work together to quickly and naturally degrade organic waste. This process not only eliminates greasy accumulations, but also helps eliminate obnoxious odors at the molecular level while a pleasant fragrance keeps traps and plumbing lines smelling fresh.

DIRECTIONS

Grease Traps: Use 8 to 20 oz of product daily depending on the size of the grease trap, type of cooking, cleaning procedures and volume. Used properly, this product will drastically reduce costly pumping charges and BOD waste water surcharges.

Drain Pipes: For Slow Drains: Pour 4 to 8 ounces of product in drain. Let stand overnight. Repeat in two or three days. If drain has not improved, check for obstruction. To prevent Slow Drains: Pour 4 to 6 ounces down each drain, shower, lavatory, kitchen sink, or commode once each month. Double this amount for septic tanks.

Lift Stations: Treat directly as the wells fill and add at least 3-5 gallons per million gallons of flow through capacity. Repeat with one gallon treatment per week as a preventative maintenance program to maintain an odor free system.

Septic Tanks: Add 1 quart for your initial treatment. Thereafter use 8 oz. per week by flushing down commode.

Portable Toilets: Add 1 gallon directly to toilet and cover solids with water to aid digestion. Repeat procedure every time the toilet is pumped.

KEEP FROM FREEZING
