How-to guide on washing your car

Please find inside a quick guide on the correct washing techniques as well as the products which should be used:

1

STEP ONE:

Liberal spray the 'Perfect' Wheel Cleaner onto the wheels and agitate the product by using soft bristle brushes or the Topaz Wheel Woolies, remember to clean the inside of each spoke of the wheel before rinsing it off. If required, repeat this step again until wheels are clean. Do not wet the body until after the wheels are cleaned. Do not wash wheels when they are still hot or in direct sunlight.

Tools Needed:
Topaz Wheel Woolies

Products Needed:
Topaz Wheel Cleaner

2

STEP TWO:

Snow foam the car using 'Effective' Snow Foam, lance and jet wash. Add the snow Foam to the lance at a ratio recommended on the product label with water, then attach it to your jet wash. This process is very important in gently lifting any dust, grit and grime from the paint or PPF surface before washing commences. Leave this product on the car for 3-5 minutes then jet wash it all off. (Avoid direct sunlight)

Tools Needed:
Heavy Duty Foam Lance

Products Needed:
Topaz Snow Foam

3

STEP THREE:

We recommend washing your car using the two bucket system. Fill both buckets with water, add the 'Cleanse' Luxury Shampoo into one and leave the other with only water. Make sure you use a jet wash or hose pipe to foam up the bucket with the shampoo.

Dip the wash mitt into the soapy water and proceed by treating the roof first. Make sure you place the mitt into the bucket with only water to take off the dirt, then place the mitt back into the bucket with the soap and start the process again, one panel at a time. If any bug splatter remains, before jetting the car off spray some 'Clear' Bug Remover over the splatter, leave to dwell and go over gently with the wash mitt. Then jet the whole car off starting from the top down.

Finally, to add hydrophobic sealant to the clean paintwork or PPF, spray 'Impressive' Hydro Lite onto the wet vehicle's body panels and wheels, avoiding the windscreen where possible. Without leaving it to dwell, rinse the vehicle from top to bottom.

Tools Needed:
Bucket and Grit Guard
x2
Wash Mitt x2

Products Needed:
Topaz Luxury Shampoo
Topaz Bug Remover
Topaz Hydro Lite

4

STEP FOUR:

Without applying pressure to the paint, tap dry or gently wipe the car using the deep pile microfiber drying towel. Using regular microfiber cloths, dry the door shuts, and other hard to reach areas. Treat the windows with the 'Purify' Glass Cleaner by spraying liberally onto a microfiber and buff off. Next, apply the 'Restore' Tyre Dressing to clean tires using the foam pad. Wipe away excess with a cloth.

Treat the interior with the 'Rejuvenate' Interior Cleaner by spraying on to a horsehair brush or damp microfibre cloth. Apply liberally to small sections, agitate and wipe away any excess.

Finally, remove any smudges or watermarks by spraying the 'Maintain' Quick Detailer onto the paint and dry using the buffing towel.

Tools Needed:
Topaz Car Care Deep
Pile Drying Towel

Products Needed:
Topaz Glass Cleaner
Topaz Tyre Dressing
Topaz Interior Cleaner
Topaz Quick Detailer
