<b>Introduction</b>	13
What is a sitngo?	13
Why play sitngos?	14
How much money can I expect to make?	14
<b>1 Pre-Game Strategies</b>	16
Prepare yourself	16
Game selection	16
Assessing your opponents	17
Structure implications	18
Turbo vs. standard speed sitngos	21
How much should you expect to pay in entry fees?	22
A note on multi-tabling sitngos	23

<b>2</b>	<b>Other Considerations</b>	24
	Introducing position	24
	Introducing hand ranges	25
	Introducing EV (Expected Value)	26
	Introducing ICM (the Independent Chip Model)	26
	Harnessing the power of ICM	31
<b>3</b>	<b>The Early Game</b>	32
	Introducing the early game	32
	How well do you 'play poker'?	32
	Playable hands in the early game	33
	What type of game are you in?	37
	Limping vs. raising	39
	Playing in the blinds	40
	Calling raises, reraising and moving all-in	41
	ICM considerations for early game play	42
	How your strategy changes as your chip stack increases	45
	How your strategy changes if your chip stack decreases	45
	Thoughts on tight vs. loose play in the early game	46
	Postflop play in the early stages of sitngos	47
<b>4</b>	<b>The Middle Game</b>	51
	Introducing the middle game	51
	Introducing effective stack sizes	51
	How preflop hand selection alters as your stack size diminishes	52
	A note on blind stealing in sitngos	53
	A note on the size of your opening raise as the blinds increase	53

Reraising and flat calling a raise in the middle game	54
Being reraised	56
ICM considerations for middle game play	56
Defending the blinds	57
<b>5 The Late Game</b>	<b>59</b>
Introducing the late game	59
The all-in zone	59
Playable hands in the late game	61
Assigning hand ranges to all-in players	65
Playing against limpers and limping with high blinds	67
ICM considerations for late game play	68
A note on antes	69
<b>6 The Bubble</b>	<b>71</b>
Introducing the bubble	71
The sitngo player's dilemma – hang on for third or play to win?	72
ICM considerations for bubble play	72
Moving all-in on the bubble	74
A note on assuming optimal opposition, and accounting for suboptimal opposition	76
Assessing stack sizes, blind structures and seating positions	76
When all stacks are similar in size	77
When you have a dominating stack	79
When one of your opponents has a dominating stack	81
When you have a short stack or micro-stack	82
Attacking your nearest rivals	83

Calling all-in (and calling an all-in) on the bubble	84
Cooperative vs. non-cooperative bubble strategies	86
Manipulating all-in situations when players are short-stacked	87
Planning for and manipulating blind increases	89
When the stacks are still deep on the bubble	90
Playing a dominating stack when deep	90
Playing a medium stack when deep	91
<b>7 In the Money (playing three-handed)</b>	<b>93</b>
Introducing the money stages	93
Re-evaluating the payout structure	93
ICM considerations for three-handed play	94
Re-evaluating your strategy for three-handed play	95
When the stacks are still deep in three-handed play	96
<b>8 Heads-Up (playing one-on-one)</b>	<b>98</b>
Introducing heads-up play	98
Playing in a cash game freezeout	98
Smallball vs. jam or fold strategies	99
Playing smallball	99
Jam or fold	100
<b>9 Strategies for Non-Standard Sitngos</b>	<b>104</b>
Six-max sitngos	104
Two-table sitngos	107
Sitngo satellites with only one prize	109
Sitngo satellites with more than one prize	109

Making your own assessments of non-standard sitngo structures	110
When a level is determined by number of hands rather than time	111
A note on button movement when a player is eliminated	111
<b>10 Miscellaneous Topics</b>	<b>113</b>
The limitations of ICM	113
Other ICM considerations	117
Sitngo tools and resources	118
Bankroll considerations based on ROI and variance	120
Moving up!	124
From \$200 to \$100,000 in one year (and 5000 sitngos)	125
The future of sitngos	128
<b>11 Sitngo Quizzes</b>	<b>129</b>
Introducing the quiz section	129
The early game	130
The middle game	151
The late game	167
The bubble	179
In the money (playing three-handed)	200
Heads-up (one-on-one)	206
Non-standard sitngos	217
