

111 - 10ft Booth Combo

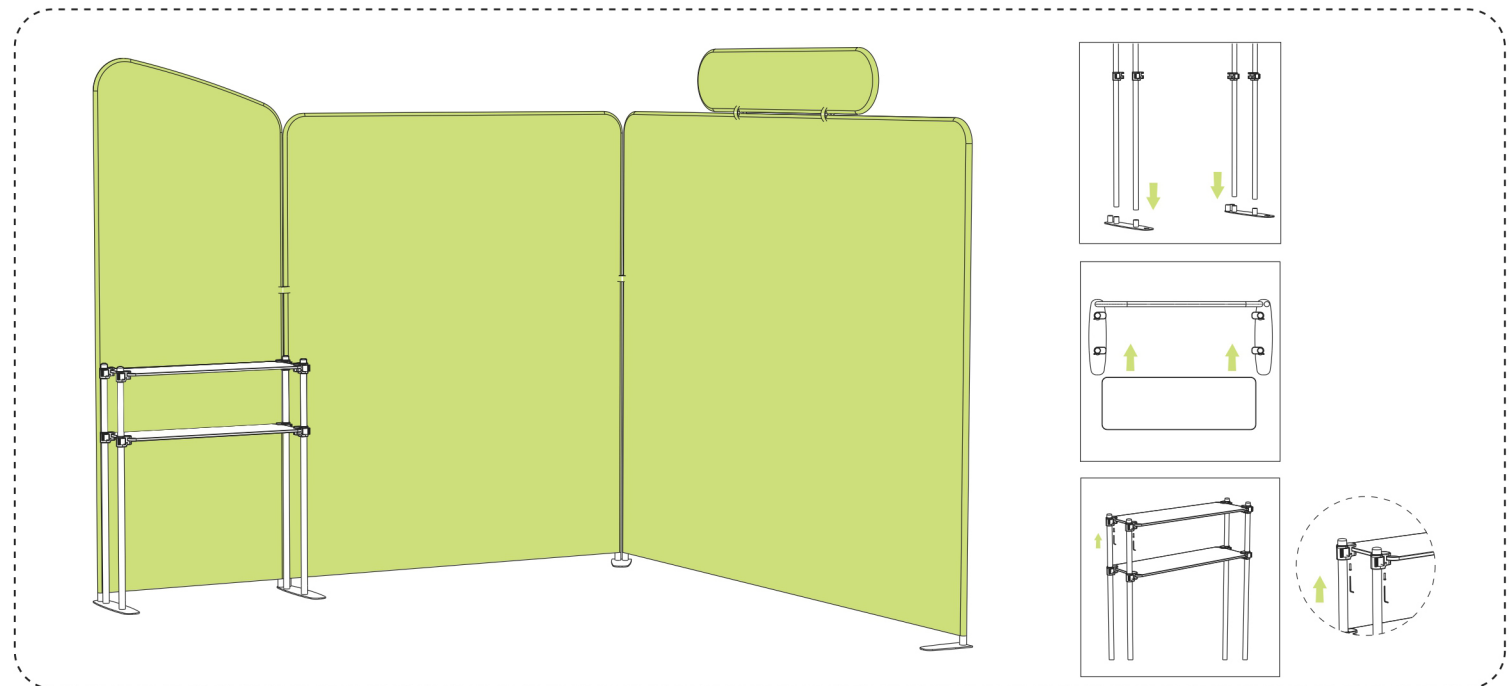

1 Connect tubes of the frame (there are number labels on tubes)

2 Wrap up the frames with the graphic from top to bottom and zip up, the same step for the header, then fix it on the top with clips. Lastly, put them on the metal base

3 Put the clip between two frames and fix it with screw, we have four kinds of metal bases (A, B, C, D).

4 Put the aluminum tube of layer board on the metal bases, then install the shelf boards. Finally fix it with screw. Finish.
