

BOBBY

SIZE GUIDE

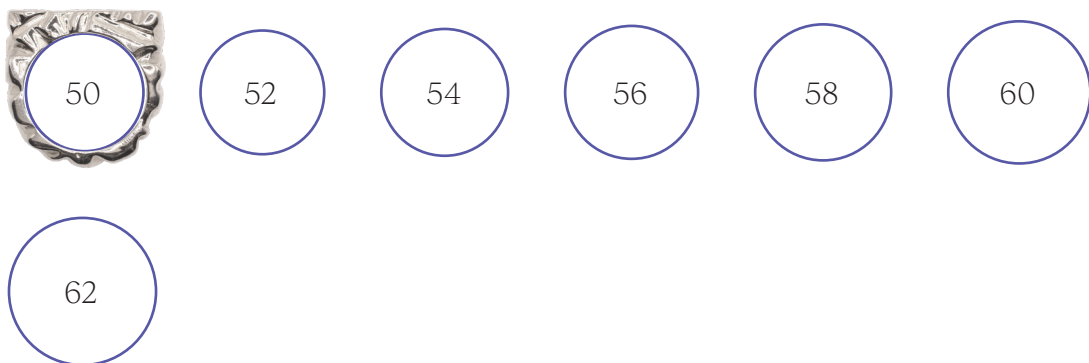

You want to buy a ring but don't know your size? Let us help you. Find a ring (your own, a friends, ...) that fits the finger where you want your new BOBBY ring. Place this ring on the circles below to decide which size you need to choose. The diameter of the circle has to have the exact same diameter as the interior of your own ring.

2cm

Print this page without scaling and check the scale using a ruler. It has to be 2cm including the 2 vertical lines.

The purple line needs to be visible when you place your ring on the paper. If your ring is between two sizes it is better to take a bigger size.

BOBBY is not responsible for any mismeasurement. If you are in doubt you can always pass by a professional such as ourselves or a goldsmith in your neighbourhood. If you have any questions, email us at ice@bobbyjewels.com
