

## **SOMOSBEDS PICKS UP CERTIPUR-US® RECOGNITION FOR CLEAN, TOXIN-FREE MATTRESSES**

SomosBeds ([somosbeds.com](http://somosbeds.com)) is honored to accept the CertiPUR-US® stamp of approval for all of our mattresses.

CertiPUR-US® is a certification program administered by a not-for-profit organization. To ensure the foam inside of your mattress meets the CertiPUR-US® standard, the mattress foam is tested twice in the same year, then once a year after that. The mattress foam is tested for content, emissions, and durability.

CertiPUR-US® certified foam is made without: dangerous flame retardants; mercury, lead, and other heavy metals; formaldehyde; and phthalates – which can be harmful to children.

Not only can a mattress be harmful to your health, it can also damage the environment.

CertiPUR-US® certified foam is made without ozone depleters. This means in order to get CertiPUR-US® certified, the foam cannot contain chlorofluorocarbons – or CFCs – that have been shown to deplete the ozone layer. In this way, a CertiPUR-US® foam mattress protects you and the environment.

### **About SomosBeds:**

The idea behind SomosBeds was simple: Let's make a healthy, affordable mattress for everyone. A lot of other mattress-in-a-box companies will throw a lot of gibberish at you when it comes to "special features" their mattresses might have. This is what we can promise you: We are safe; we are comfortable; we are affordable; we are healthy. We are SomosBeds.
