

As a Full-Stack Developer at sygns you will be contributing to building up our frontend and backend. As the perfect candidate you should be passionate about simple yet effective user experience with empathy for the target groups interests. Your approach should be driven by experimenting with cutting edge technologies while maintaining a reliable and rocksolid workflow.

(Junior) Full-Stack Developer (m/f)

Your role at sygns?

- You will create websites and applications with JavaScript node.js, PHP and HTML
- You are responsible to implement web and mobile interfaces
- You will work with our Operations Team to build up the backend for our shop system
- You will cooperate with our Design team to create a great customer experience

Who we are looking for?

- You have 1+ years experience as Full-Stack Developer
- You have experience to develop with JavaScript node.js and PHP
- You have ideally knowledge in programming with react and AngularJS
- You have familiar with using nodeJS based build environment (Grunt, Gulp, Webpack)
- Ideally active or former open source contributions
- You are in love with details and work in a structure way
- You are a team player
- You are fluent in English and German

Why work for sygns?

Next to team events and coffee for free...

- ... we believe in flat hierarchies
- ... we do not only speak about family atmosphere, we actually live it
- ... you can expect exciting tasks with a lot of responsibility
- ... we care about your personal and professional development
- ... we are dog lovers!

Full-Stack Developer is more than just a job for you; it's your passion?

Then apply to sygns and together we might take new paths! Just send us your CV, motivation letter, list of references, salary expectations and start date to recruitment@sygns.com.
