LATEST TECHNOLOGY

100% Sustainable

We are the first company to have realized a 100% circular mattress within the Maritime. The materials are specially chosen from all over the world to ensure the well-being of the customers. This is not where we stop, the recycled materials are re-produced at the same quality level and can be used over and over.

100% Ventilation

Hespera mattresses have the highest level of ventilation in the world. The 3-D Airvent canvas in combinations of our choice of latest materials provides the best ventilation thanks to the weave structure. This is especially important when beds have to deal with different conditions. There is a big difference in usage intensity between different people.

100% Personalization

All Hespera mattresses have been developed on the basis of years of scientific research. The measurements we have carried out over the years provide us with the necessary knowledge about exactly how an ergonomic mattress should be constructed.
