

To complete this project  
you will need:

\*Heartgrooves Handmade Felt  
Ball and Wood Bead Keychain  
Craft Kit

\*Scissors to trim twine

\*Hot glue + glue sticks (Mini high  
heat recommended). A quick dry  
tacky liquid glue could also be  
used.

\*Small pliers to pull needle  
through felt balls and smaller  
wood bead openings if needed.

## Kit Contents:

- \*3 wool felt balls, 1.5-2.5 cm
- \*1 specialty felted wool shape
- \*1 Geometric Wood Bead
- \*1 16mm wood bead
- \*18 inches of natural twine, with a knot tied, a craft  
needle threaded and a 10mm bead threaded onto the  
twine to form the base of the keychain
- \*Key ring and snap hook

## To get started:

\*Lay out your felt balls and beads in the pattern you want to follow for the diffuser. I like to have the specialty felted wool shape at the top, but it can be any way you'd like!!

\*Unwrap the twine bundle, the needle will already be threaded along with the small 10mm bead which will be at the bottom of the finished keychain. The twine will already be knotted as well.

\*Start stringing the felt balls/beads onto the needle and push to the end of the twine to meet the small bead. Start with the piece you want at the bottom of the keychain and keep threading in reverse order ending with the 16mm wood bead. It can be difficult to pull the needle through through the larger felt balls since the needle is blunt, it is helpful to use some small pliers to pull the needle all the way through. Wiggle the needle and push very hard to get the needle started. You could also use a tool such as a small awl or paper piercer to create a hole if you have one of those on hand.

## Add the Keychain:

*\*\*{If you don't want to use the keychain, see alternative instructions for making a twine loop hanger}*

\*Once all of the pieces are threaded onto the twine, attach the keychain by threading the twine through the base of the snap hook. Then push the needle back through the wood bead and the piece below it.

\*Push the needle back up through the top 2 pieces and loop it around the snap hook a second time, pushing the needle back through the top 2 pieces.

\*Trim any extra twine and add a dab of hot glue on the knot to secure.

## *\*\* Alternative Loop Hanger:*

\*Once all of the pieces are threaded onto the twine, make a loop with the remaining twine and tie in a knot as close to the top bead as possible. trim any extra twine and add a dab of hot glue on the knot to secure. Trim any extra twine from the bottom of the keychain as well.

## *Add the tassel:*

\*Hot glue the tassel to the end bead by placing a small dot of hot glue on the twine knot at the base of the keychain, place onto the top of the tassel and press so none of the twine knots are showing. If using a tacky liquid glue, hold the tassel in place until it is secure.

\*You're all done! Use as a keychain, clip onto your purse or use as an essential oil diffuser to freshen up your car (or anywhere!)

*Thank you for purchasing this Heartgrooves Handmade Keychain Kit!*
