UNDERBODY SERIES BLANKETS

Prewarm your patients - As little as 15 minutes of pre-induction forced-air warming can reduce the severity of re-distribution temperature drop. Now you can warm your patients from the start.

The Bair Hugger Underbody Series blanket features:

- Advanced blanket designs warm the patient while providing full, unrestricted patient access
- Fluid outlets minimize pooling of fluids on the surface of the blanket
- Pass-through slit design allows for flexible patient positioning and accommodates the use of a drawsheet (where applicable)
- Soft, radiolucent, latex-free materials
- Resealable hose ports at either end of the blanket provide options for hose placement (where applicable)
