

2000 Plus™

## AMBULATORY INFUSION PUMP

Finally, an ambulatory infusion pump that uses straight line sets to provide cost-effective, accurate medication delivery.

The Curlin Medical 2000 Plus is a five-therapy, electronic, ambulatory infusion pump that provides low cost infusion therapy using straight line PVC sets. Consistent, reliable flow rates and easy operation makes the 2000 Plus an ideal choice for low cost ambulatory infusion therapy.

 *Holding the Line on Infusion Costs!*

**Low cost, easy to use, accurate.** Three great qualities of the Curlin Medical 2000 Plus Ambulatory Infusion Pump. The 2000 Plus is an innovative new ambulatory pump that uses straight line PVC sets for low cost medication delivery. Straight line sets eliminate the costs associated with using expensive pumping chambers and cassettes. Menu-driven protocols, HELP screens and easy operation provide shorter inservices and patient training times. "Curvilinear Peristaltic Action" provides a pumping technology that creates safer, more uniform and accurate delivery of medications. Additional benefits include a choice of five therapy modes and three power sources to expand your options.

## SPECIFICATIONS

Type of device	Multiple-therapy electronic, ambulatory infusion pump.
Therapies delivered	Continuous PCA with IV, Epidural or sub-Q delivery TPN with ramping Intermittent Variable with 24 specified doses
Size	5.0" x 4.0" x 2.5"
Weight	17.5 oz.
Accuracy	± 6%
Flow rates	0.1ml to 400ml/hr.
Volume limits	1.0ml to 9,999ml
KVO rates	0.0 to 10ml/hr; default to 0.1ml/hr.
Power sources	2 "C" alkaline batteries; AC; External rechargeable battery pack
Battery life	Nominal 85 hrs. @ 2ml/hr. Nominal 30 hrs. @ 125 ml/hr.
Alarms	Infusion complete, Air-in-line (selectable), occlusion upstream, occlusion downstream, door open, set not installed, unattended pump, replace set, high upstream pressure, empty battery
Alerts	Alert messages help the user in correcting operations
Disposables	Standard and non-DEHP PVC administration sets with integral free-flow protection
Accessories	Remote PCA bolus cord, Rechargeable battery pack, Soft carry packs, lock boxes (150ml and 250ml/ syringe), pole mounts, Data interface cable
Additional features	RS232 Data Interface Port; Titration in Continuous and PCA Modes; Three lock levels for security; Unused therapies can be locked out; HELP screens; Printable history log; Approvals; UL 2601-1 classified and CSA C22.2 no. 601.0; UL 544 listed and CSA C22.2 no. 125; EMC certified per EN 60601-1-2 and EN 60601-2-24.
