

POWERFlexx[®]+

*Advanced Power Management
700 lb unassisted lifting*

POWERFlexx[®]+

ADVANCED POWER MANAGEMENT

The NEW **POWERFlexx+** System delivers advanced power management features and **in-the-fastener charging** with the ICS Integrated Fastener Charging System, to keep you powered on every call without having to carry around extra batteries or take them out to charge.

700 LB UNASSISTED LIFTING

The **POWERFlexx+** Powered Ambulance Cot also features 700 lb unassisted lift capacity. The cot lifts the 700 lb. weight, not the operators, reducing situations where operators may injure their back.

FEATURES

POWERFUL

- ▶ The ICS - Integrated Charging System is built into the cot fastener and keeps the battery powered for an unlimited number of runs, eliminating the need to carry around extra batteries or take them out to charge
- ▶ Sleep mode preserves battery life and wakes up at the touch of the activation pad, so a strong charge is always there when you need it.
- ▶ Hydraulic Actuator Unit with dual rail system provides smooth and stable activation.
- ▶ 700 lb unassisted lifting capacity, the highest in the industry.

SAFE

- ▶ 700 lb lifting capacity reduces situations where operators may injure their back.
- ▶ No pinch points anywhere along the mainframe of the cot.
- ▶ Wide Wheel Base, Placement of Motor & Battery, and proper X-frame positioning create lower center of gravity and greater stability.

MANEUVERABLE

- ▶ Five Position Drop-frame and multi-position Foot-end Lift Bar provide better leverage for lifting and loading and accommodates movement in confined spaces.
- ▶ Infinite bed height adjustment from 12" to 41" giving you the greatest range and flexibility to transfer the patient on to the cot.

COMFORTABLE

- ▶ Improved Patient Surface increases surface length by 6¼ inches to accommodate taller patients and keep the patient's feet away from operators.
- ▶ Dual Lifting Cylinders and Rails provide smooth and even lifting for greater patient sense of security.

FLEXIBLE BARIATRICS

- ▶ No need to have a dedicated, bariatric only, cot. The **POWERFlexx+** features 1000 lb capacity and full 360° maneuverability in the lowest position and quickly converts to a full bariatric cot with accessories such as the removable LBS Jr. Bariatric Board, Manta Transfer Sheet, Push Pull Handles, and Tow Package.

SPECIFICATIONS

Length:	Maximum:	83" (211 cm)
	Minimum:	61" (155 cm)
Width:		24" (61 cm)
Max Loading Height:		34" (84 cm)
Weight:		132 lb (60 kg)
Lifting Capacity:		700 lb (318 kg)
Load Limit:	Loading Position:	700 lb (318 kg)
	Lowest Position:	1000 lb (450 kg)
