# Front Fender Assembly

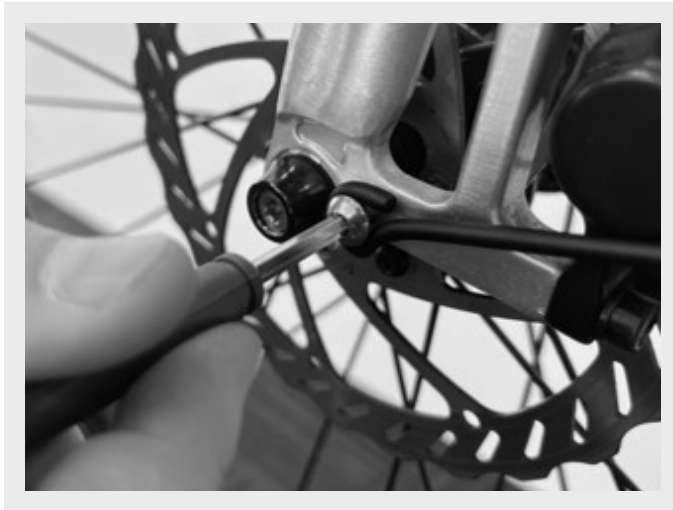

1/ Secure the front fenders with the longest Clamp using the upper and lower clamp with S1 screws. (do not tighten them)

2/ Insert the front fenders above the front wheel through the rear side of the fork and secure it by washer and the centre bolt B1 with '10' Spanner. (do not tighten them)

- 3/ Secure the stay using S2 screws on the either side of the wheels on the fork using the 4mm allen key (supplied with your e-Bike)

- 4/ Adjust the fender to the right position by keeping a good clearance with the wheel and tighten all the screws.

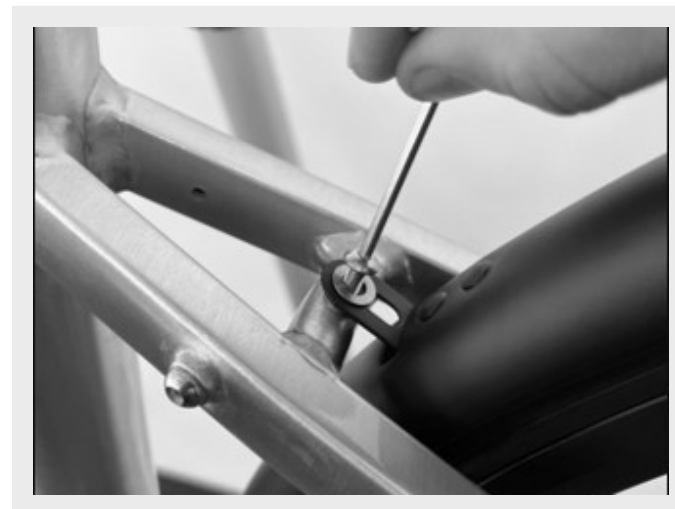

# Rear Fender Assembly

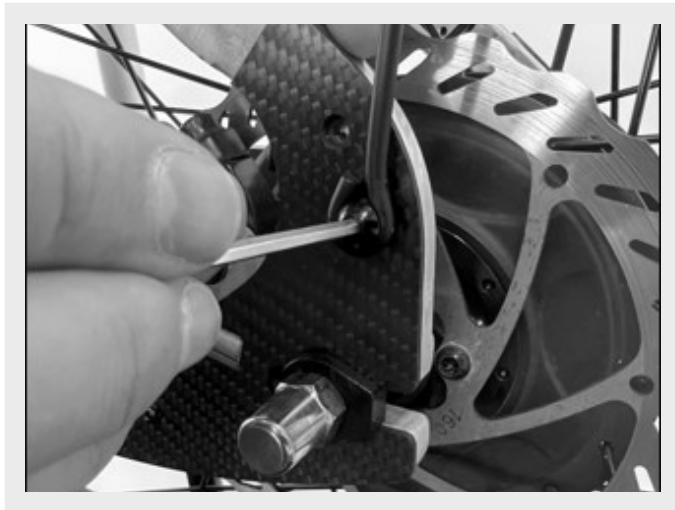

- 1/ Secure the rear fenders with the short stay using the upper and lower clamp with S1 screws. (do not tighten them)

- 2/ Insert the rear fenders above the rear wheel through the seat stay and secure it by the washer & S3 screw with 4mm allen key. (do not tighten them)

- 3/ Secure the Stay using S4 screws (on your E-bike) on the either side of the wheels near the axel using the 4mm allen key (supplied with your e-Bike)

- 4/ Adjust the fender to the right position by keeping a good clearance with the wheel and tighten all the screws.

# Disclaimer

Please note your bike warranty does not cover incorrect assembly or installation of parts. To find a recommended service centre near you, please head to [nplusbikes.com](http://nplusbikes.com), or alternatively a local reputable bike shop.
