Please note your bike warranty does not cover incorrect assembly or installation of parts. To find a recommended service centre near you, please head to nplusbikes.com, or alternatively a local reputable bike shop.
1/ Firstly, remove the gear cable brackets on the right side of the rear hub.

2/ Remove the bolts on both sides of the rear wheel with a 15mm spanner.

3/ Unscrew the belt tensioner on both sides with a 5mm allen key.
4/ Ensure that the screw is no longer touching on both sides.

5/ Check that tension in the belt has been removed by squeezing the belt.

6/ Gently remove the carbon belt using a plastic tire lever.

7/ Firmly grip the bike frame and pull the rear wheel backwards to remove.
8/ Gently pry the tire using tire levers.

9/ Replace the tire onto the rim, starting with positioning the Presta valve attachment. Make sure the tire is spinning in the right direction.
